## EXECUTIVE SUMMARY

Ganges River Dolphin is an indicator species of health of the river ecosystem. Being the only mammalian predator of the Ganges which is exclusively aquatic, it occupies the apex of the food chain and plays a vital role in maintaining the essential balance of its ecosystem. In spite of being a flagship species, representing an ecosystem in need of conservation, its status has become a matter of serious concern to its existence over the past few decades. The total estimated population of Ganges river dolphin ranges between 2500 and 3000 individuals throughout its distribution range (in the river systems of India, Nepal and Bangladesh), out of which more than 80% are found in India.

Ganges river dolphin has been included in Schedule I of the Indian Wildlife Protection Act 1972 and in Appendix I of the CITES (Convention on International Trade in Endangered Species). It is included in Appendix II of the Convention on Migratory Species (CMS) and categorized as Endangered in the IUCN Red List of threatened animals. Looking at the urgency and also to focus on the conservation of this magnificent species, Ministry of Environment and Forests has declared the Ganges river dolphin as National Aquatic Animal on 5 October 2009.

Dolphin experts and scientists have prepared a conservation action plan for the period of 2010-2020 where one of the action points is focused on education and awareness about the dolphins. Centre for Environment Education, northern regional cell (CEE North) with the support from National Mission for Clean Ganga as part of the National Ganga River Basin Authority, Government of India has approved a three year Ganges river dolphin – conservation education programme for Ganga basin focusing on UP and Bihar.

The phase II aimed at reaching out to schools, river side community and youth. The project would be implemented along the river Ganga and its tributaries flowing through Uttar Pradesh and Bihar.

### School Component

- Formation of 20 School clusters involving 30-35 schools with the support from local partner NGOs.
- Orientation of partner agencies for facilitating activities at the project location.
- Teachers training and review meetings for school teachers
- School level activities of students as ‘Dolphin clubs’ or ‘Sons Samooh’
- Cluster level awareness events to reach out to community
- Formation of Ganges River Dolphin Resource Centre in one of the cluster school
- School and community interface melas for sharing of experiences
- Spreading awareness about species in non-dolphin locations

### Community Component

- Identification of two sites each in Uttar Pradesh and Bihar for community interventions
- Selection of villages and assessment of the conservation issues and socio-economic status of communities.
- Sensitization of farmers and fishing communities about the importance of conserving Ganges river dolphin and rivers for their life and livelihood.
- Skill based trainings and exposure visits to help community to build capacities and for making informed decisions.
- Demonstration of sustainable and alternate livelihood options to reduce pressure from river resources.
- Involving Youth volunteers to keep vigil on river bank and also to promote eco-tourism activities.

## Project Components

The three year long project began in March 2014 where NMCG and CEE team met during an inception workshop to agree upon World Bank guidelines to be followed for documentation and use of finances. With the initiation of the project, an inception workshop was organized on 28 March 2014 at CEE's Ahmedabad office to understand the project activity plan and various processes at NMCG and CEE. This workshop was aimed at sharing the learning of Phase I of Ganges River Dolphin Conservation Education Programme, orientation of CEE core project team to the financial and accounting aspects and discussion on reporting formats.

With this, project activities were initiated as proposed and overall plan was shared. The project looked at two main components - one was school focused interventions and other one was community interventions. A programme brochure was developed in English and Hindi to start networking in the field. School component involved working with schools, school authorities, district officials, local NGO and other stakeholders along Ganga and its tributaries. While Community component was focused on river side village level activities, youth, local officials, institutions, government departments etc. To start activities under each component, identification of schools and villages began.

Mr. Pushkal Upadhyay, Director (finance) NMCG addressing group during inception workshop

### School Component:

Under the project, CEE team identified 10 locations each in Uttar Pradesh and Bihar by referring to various studies related to presence of Ganges river dolphin and conservation issues. Overall 20 locations were identified; school clusters were formed where 35-40 schools were selected which were situated close to river Ganga and its tributaries. Teachers were selected and were given training for running the activities in the school.

An educational kit was provided to teachers to help them in running the programme in school. A dolphin club was formed in schools where teachers conducted classroom level and school level activities were conducted.

Three locations were selected where dolphins are not found to create awareness about national aquatic animal. In each school dolphin cluster, awareness events were conducted on environment days or any other occasion.

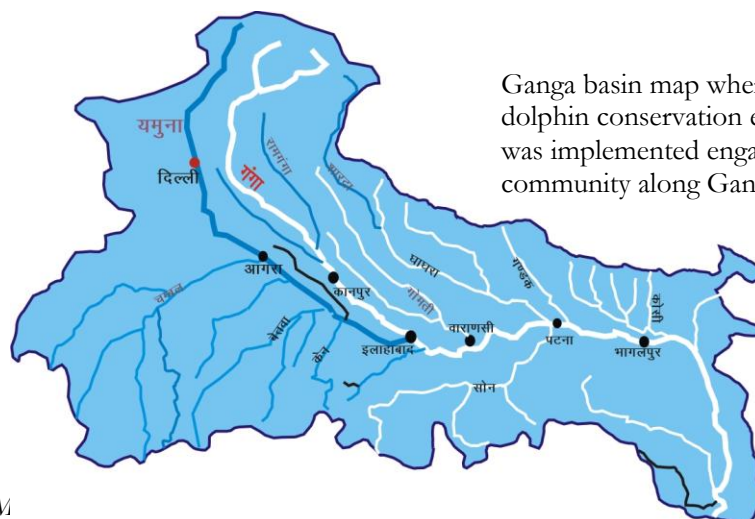

### Community Component

Riverside villages were identified under the project for community level interventions to adopt sustainable options which were promoted through different programmes, and beneficiaries were also identified for various interventions such as vermi-composting units; backyard and riverbed farming, alternative livelihood options etc. These villages were residing along tributary of Ganga and location where dolphin population is surviving was taken to raise awareness among community. CEE team regularly did field visit to project villages and interacted with community members. A Souns Sanrakshan Samiti was formed where members were taken from community including village leaders, women, youth volunteers etc. In the committee, members discussed about livelihood interventions and consultation meetings were conducted to sensitize villagers.

With the formation of Souns Sanrakshan Samiti, beneficiaries were introduced to new techniques of vegetable farming, energy options, organic riverbed farming, sanitation related initiatives etc. As part of dolphin project, one of the aspects was to promote ecotourism focusing around national aquatic animal and also bring together community and schools at one platform. Active youth were selected as volunteer who were given training. Monthly follow up meeting held with all the youth volunteers. Volunteers provided support in dissemination of information about demonstration and educational material to community members and also motivating community members for adopting organic farming, solar energy options and sanitation.

CEE team interacting with farmers and fisherman on adopting sustainable farming and fishing

Ganga basin map where Ganges river dolphin conservation education project was implemented engaging schools and community along Ganga and its tributaries

## SCHOOL COMPONENT

### 2.1.1 Dolphin Cluster formation and Teachers Training

Schools residing close to river bank were identified with the help of education department. The schools showing interest in joining the programme were registered in the programme. Total 747 schools were involved in both the states for dolphin conservation education.

#### Dolphin Cluster in Uttar Pradesh

Name of River	Location of Cluster	District	Number of Schools	Coordinating agency

Detailed reports of these workshops are provided in respective quarterly reports. Glimpse of these teachers training workshop is as under:

TTW held on 25-26 August 2014 at BHU in Varanasi

TTW held on 15-16 September 2014 at Allahabad in Anglo Bengali Inter College

TTW held on 19-20 September 2014 at M. L. M. L Inter College, Faizabad

TTW held on 9-10 October 2014 at Jarwal Resource Centre, Bahraich

TTW held on 16-17 October 2014 at Block Resource Centre, Gajadharpur, Bahraich

TTW held on 8-9 November 2014 at Terai Education Society, Katerniaghat, Bahraich

TTW held on 10-11 November 2014 at Forest Training Centre, Hastinapur, Merrut

TTW held on 3-4 December 2014 at Shiksha Bhawan, Bijnore

TTW held on 18-19 January 2015 at BRC, Gonda

DFO Kanpur addressing teachers in TTW held on 8 March 2016 at BRC, Kanpur Nagar

Film screening during TTW held on 23-24 September 2014 at B N Inter College, Supaul

TTW held on 27-28 November 2014 at SMS Mission School, Bhagalpur

TTW held on 19-20 December 2014 at St. Columbus School, West Champaran

TTW held on 22-23 December 2014 at Madhya Vidyalaya, Dumri, Begusarai

TTW held on 16-17 January 2015 at Jila Vidyalaya Chhapra, Saran, Bihar

Outdoor activity during TTW held on 22-23 January 2015 at Middle School, East Champaran

TTW held on 27-28 January 2015 at Upgraded Middle School, Muzafarpur

TTW held on 15-16 July 2015 at Oxford Public School, Bagaha, West Champaran

Prof. R. K. Sinha addressing teachers in TTW held on September 2015 at Rajkiya Madhya Vidyalaya, Patna

Explaining echolocation to teachers in TTW held on 18-19 September 2015 at Urdu High school, Gopalganj

Namami Gange film screening during teachers training workshop to discuss status of rivers

Teacher following activity from dolphin manual provided during training

During concluding ceremony teachers fill feedback, participation certificates are provided and a group photo is taken

## 2.1.2 Annual Review cum Orientation Workshop

CEE identified 11 local NGOs as partner organization for school activities in 14 dolphin cluster locations. These partner NGOs were given extensive training with the start of the project on 12-13 June 2014. UP Forest Department and Bihar Forest Department was invited to share their state plans for dolphin conservation. A one day review meet was conducted annually which happened in next 2 years of the project consequently on 17 June 2015 and 7 June 2016.

### Glimpse of workshops

First Orientation cum Review workshop held in June 2014 for partner NGOs, detailed report submitted as first quarter report.

Release of programme brochure by Mr. Rupak Dey, PCCF-Wildlife, UP Forest Department along with Mr. A. K. Pandey, RCCF, Vikramshila Gangetic Dolphin Sanctuary, Bhagalpur, Bihar Forest Department and Mr. Anurag Yadav, Deputy Director of Directorate of Environment, Government of UP during orientation cum workshop was organized by CEE North on 12 and 13 June 2014

Mr. Saumyasib Mukhopadhyay, Senior Environment Specialist, NMCG and Ms. Preeti R. Kanaujia, CEE North presenting memento to Shri V. N. Garg, Principal Secretary Environment and Forest, Government of Uttar Pradesh during concluding ceremony of the workshop. Mr. Garg addressed participants and appreciated the programme.

Second Progress Review Workshop was done in June 2015, detailed report submitted in quarter fifth report.

NGOs sharing their cluster's experience and UP - SGRCA officials Mr. P. K. Sarkar and Ms. Divya Joshi shared their work in the State during partners meet held in Lucknow

Third Progress Review Workshop was done in June 2016, detailed report submitted in quarter ninth report.

Partners NGOs from Uttar Pradesh and Bihar are being given overview by CEE team during orientation cum workshop was organized by CEE North on 17 June 2016

Interactive discussion with Partners NGOs to get insight of field level experience of engaging schools in dolphin conservation education

Similar to NGOs review meet, teachers review cum orientation meets were done annually for all clusters. Few cluster teachers training got delayed thus it was done for one round.

### Review cum Orientation Meet

Sr. No.	State	Location	No. of teachers	Date of first round of meet	No. of teachers	Date of second round meet

### 2.1.3 Dolphin Cluster Awareness Events and Resource Centre

Each school cluster has conducted awareness events with dolphin schools. Annually one event was proposed, while at many locations more events were done by building synergy with other programmes. During these three years, all clusters have made sure that dolphin schools observe national dolphin day on 5 October and World River Day in last week of September. Apart from this other important environment days such as World Wetlands Day, World Water Day, Earth Day, Biodiversity Day, Turtle Day, Forestry Day, Environment day etc. were celebrated by dolphin school clusters. Reports of such events are provided in each quarter reports. A summary of types and number of events done by each cluster is given below.

Sr. No	State	Location	No. of events	Types of events	No. of participants
1	Uttar Pradesh	Hastinapur - Merrut	3	Rally, river bank visit, competitions, nature tour	450
2		Faizabad	3	Debate, dolphin mela, exhibition, painting, quiz	460
3		Bijnore	3	Rally, essay and painting competitions, expert talk	370
4		Bahraich (Mahsi)	7	Camp, Rally, Yatra, Competitions, Campaigns, Exhibition, Env. day celebration	4567
5		Varanasi	4	Ghat visit, exhibition, skit, rally, nature tour, quiz and painting competition	600
6		Allahabad	5	Painting, debate, poem, rally, exhibition, competition	670
7		Katerniaghat-Bahraich	4	Painting, quiz, essay, visit to river bank, exhibition	720
8		Bahraich (Jarwal)	6	Exhibition, mela, quiz, clay modeling, rangoli, skit, essay, painting competitions	1500
9		Kanpur	3	Competitions, rally, exhibition	335
10		Gonda	5	Wall painting, quiz, slogan, essay, painting, rally	655
		<b>Total</b>	<b>43</b>		<b>10327</b>
1	Bihar	Supaul	7	Samvaad, Rally, discussion, campaign, competitions, river day, dolphin day and other environment day celebration	1190
2		Bhagalpur	3	Dolphin mela, seminar, painting competition	460
3		Bettiah - West Champaran	18	Rally, competitions, river bank visit, rangoli, cleanliness campaign, plantation, walk, etc.	1650
4		Begusarai	3	Cycle rally, competitions, interactive talk, exhibition	650
5		East Champaran	3	Awareness rally, competitions, exhibition, talk	480
6		Muzafarpur	3	Pledge, yatra, cycle rally, competition	700
7		Saran	2	Slogan/Painting competition	250
8		Bagaha, West Champaran	5	Essay/painting/slogan competition, quiz, exhibition, camp, expert talk	610
9		Patna	3	Rally, competition, river bank visit, exhibition	442
10		Gopalganj	3	Painting, plantation, awareness event, exhibition	630
		<b>TOTAL</b>	<b>50</b>		<b>7062</b>

## Glimpse of cluster level awareness events at various locations in Uttar Pradesh

Dolphin club students taken on trail near river bank in Bahraich (Mahsi) cluster for plants and birds observation during biodiversity day

Dolphin club students of Varanasi school cluster taking out awareness rally from their school to nearby ghat, presented skit and offered shramdaan to clean the space

Students of Faizabad school cluster participating in debate and poster presentation

Children of dolphin schools in Jarwal (Bahraich) cluster making clay models on aquatic biodiversity and presenting skit

Students from Katerniaghat cluster participating in competition and river bank visit on the occasion of dolphin day

## Bihar School Cluster Events at a glance

School cluster of Supaul took pledge on river bank to save dolphins and save ganga; Conducted school - community meeting

Dolphin schools celebrated river day in Bettiah District of Bihar

17 riverside schools of Paru and Sahebganj block of Muzaffarpur District of Bihar participated in the rally and took pledge to save dolphin and rivers

Dolphin school of Gopalganj participating in competition and plantation

Save Dolphin Rally was conducted by dolphin schools of Bhagalpur

Dolphin schools of East Champaran Cluster participating in competition in rally

Cycle rally by dolphin schools of Begusarai Cluster and interaction with fisherman on fishing practices

Dolphin schools of Patna cluster took out rally which ended on river bank during Dolphin Day

## Ganges River Dolphin - Education Resource Centre

The Ganges River Dolphin Education Resource Centre (GRDERC) is a focal point for conservation education activities for a group of schools or institutions. In order to build the resource centre, it needs to have resources (books, equipment, posters, charts etc.) which will help students and teachers (or any other group of people) explore and learn about Ganges river dolphin and its habitat and help in conserving it. An active dolphin school was selected to become resource centre. One centre was formed in each school cluster location which acted as nodal point for resources.

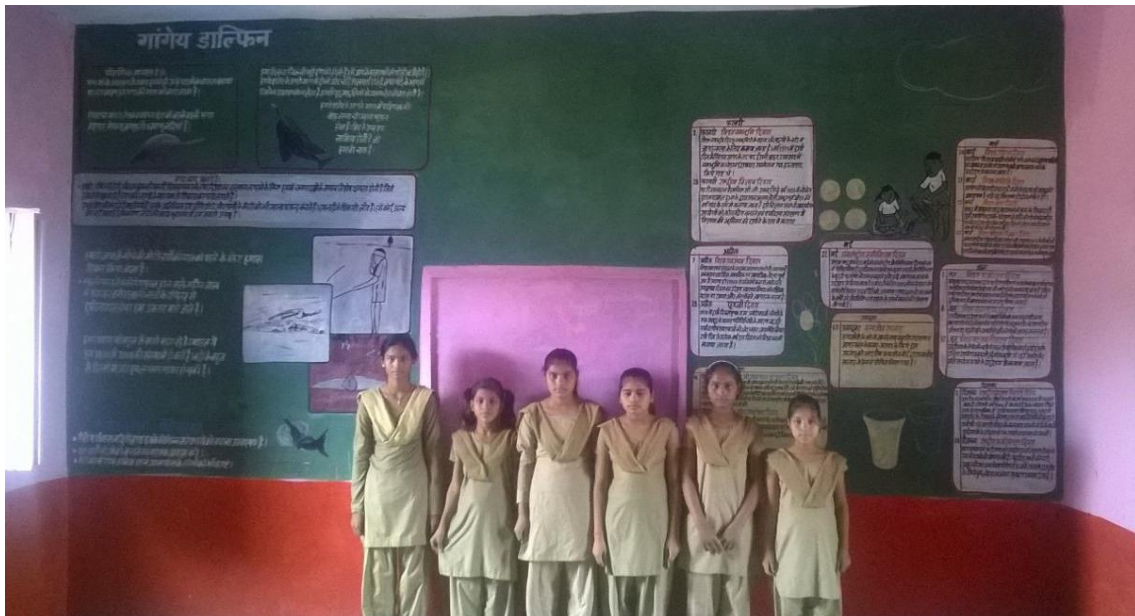

### Role of GRDERCs:

- Provided a forum for schools to come together
- Supported schools efforts in conservation action and education
- Organized awareness events for the community
- Helped schools in networking

Each GRDERC was given following set of materials provided by CEE:

- Water Quality Monitoring Kit
- Reference books, field guides for identification of Trees/Birds
- Film and Books focused on rivers and its biodiversity.
- Common flex banner for conducting awareness campaigns
- Set of dolphin material for display and campaigns

A teacher in charge or key dolphin club member student had taken the responsibility of keeping the record of resources. The selected school has created a display as wall painting or panel or board mentioning that the school is designated as Ganges river dolphin - Education Resource Centre. A designated location as dolphin corner was created to showcase resources at one place. List of schools is provided as **Annexure II**.

Dolphin Wall developed by a resource centre school in Bahraich

## 2.1.4 Outreach Events

Outreach Events were conducted in 3 locations during the project period. The objective of this event was to spread awareness and sensitize the non-dolphin location students and other stakeholders about conservation of Ganges River Dolphin. Detailed reports have been provided in respective quarter reports.

Location	Venue	Date of event	Total Participants	Details
Lucknow	Regional Science City	24 April 2015	150	8 schools of Lucknow and 5 dolphin cluster schools from Allahabad, Varanasi, Bahraich (Katarniaghat & Mahsi) and Faizabad
New Delhi	National Bal Bhawan	27 August 2015	220	20 schools of Delhi as well as 4 dolphin cluster schools from Bahraich, Meerut (Hastinapur) of UP and Bettiah and Begusarai of Bihar
Kanpur	Kanpur Zoological Garden	13 April 2017	200	22 schools from Kanpur took part in the event along with cluster schools

### Glimpse of outreach event

#### Lucknow Outreach Event

Students participating in painting competition and presenting skit

Students displaying their entries and receiving prizes by Dr. Pratibha Singh, Secretary, UP State Biodiversity Board

## Delhi Outreach Event

Student's orientation session about the species and participation in rangoli and essay competition

Qualifying teams from written test various schools participating in dolphin quiz

Judges from NMCG and CEE looking at painting entries for selection of winners

Dr. Sandeep Behera, Advisor from NMCG interacted with students and shared his experience

## Kanpur Outreach Event

Students participating in quiz and painting competition during outreach event at zoo campus

Students participating in Rangoli competition during outreach event

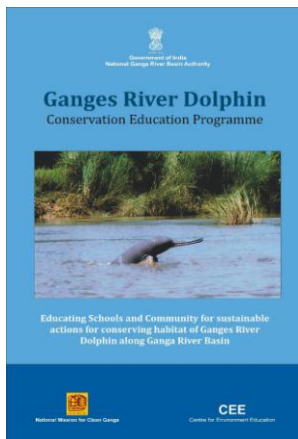

Mr Deepak Kumar, Director Kanpur Zoo, Dr Sitaram Taigor, Project Officer WWF and Mr Kewal Prasad, SDO Kanpur City addressed students and presented prizes to winner students

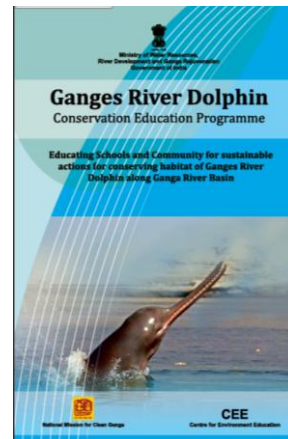

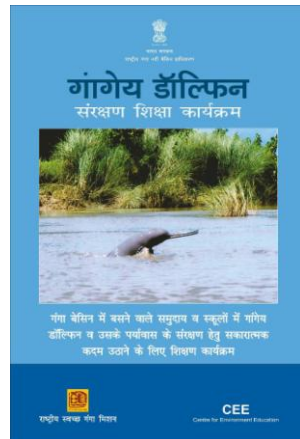

### 2.1.5 IEC Material for schools

A set of educational material was designed and developed focusing requirement of schools. Following material was developed and disseminated:

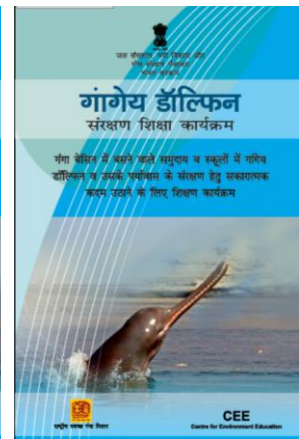

Sr. No.	Type of IEC Material	Total number and Language	Target Group	Year of development
1	Dolphin project brochure in Hindi and English	1000 Hindi copies and 500 English copies	Officials, school principals, community leaders, media etc.	2014
2	Revised Dolphin Poster	1000 copies (Bilingual)	Dolphin schools, key officials, etc.	2015
3	Dolphin manual	1000 copies (Hindi)	Dolphin school teachers and others	2015
4	Dolphin Panels and Game for exhibition	2 set for each State - English and Hindi	For display during events, workshops and exhibitions	2015
5	Dolphin T shirt	1000 copies Hindi	As prizes for students and for camps	2016
6	Dolphin Caps	1000 copies Hindi	-do-	2016
7	Dolphin Calendar 2016	1000 copies in Hindi	For clusters, key stakeholders in village, district and state and national level	2016
8	Dolphin Calendar 2017	1000 copies in Hindi	-do-	2017
9	Updated Dolphin Project brochure in third year	1000 copies in Hindi	Officials, school principals, community leaders, media etc.	2017
10	Bird Identification Chart	1000 copies bilingual	For schools	2016

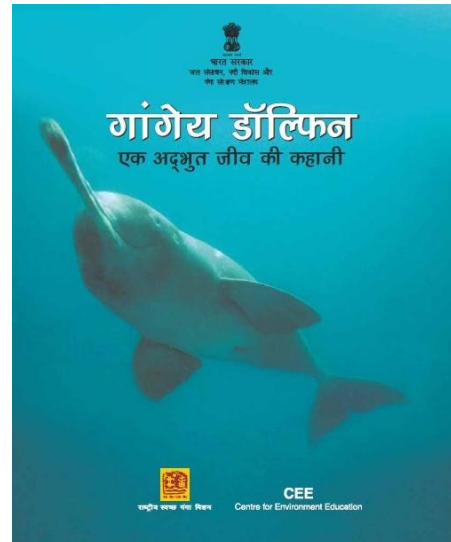

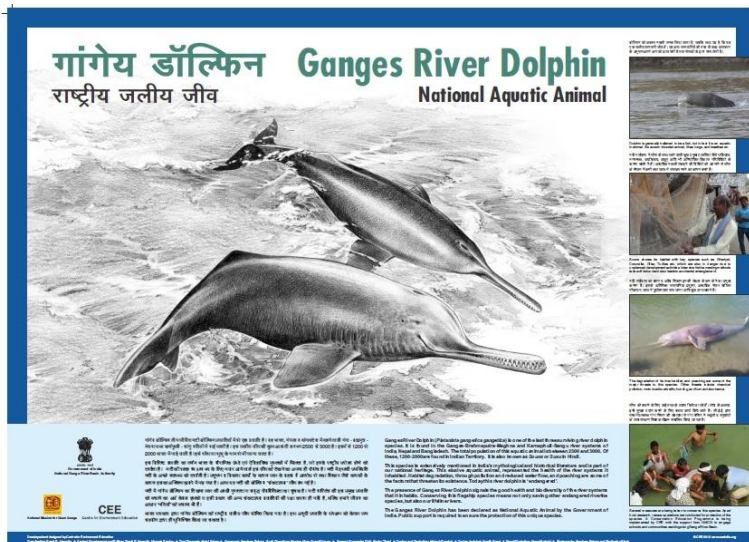

Programme Brochure developed in English and Hindi in first year

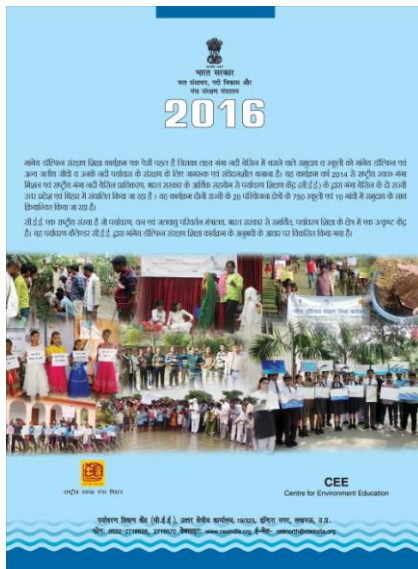

Updated Programme Brochure developed in English and Hindi in third year of the project

Revised dolphin classroom display poster and dolphin manual for schools for running activities

Year Calendar focussed in Dolphin Project activities (7 pages) developed in Hindi for dissemination of experience and awareness building

Bird identification chart of selected birds which are found in and around river Ganga for dolphin schools

# गांगेय डॉल्फिन

## राष्ट्रीय जलीय जीव

गंगा नदी के आसपास के समूह हमने ही उन्हें बचाने का प्रयास किया है। हमारे शरीर के अगले भाग में दोनो ओर बड़े फिलिफर होते हैं तथा पीछे के भाग में डिस्कना डायलस फिन होता है। हमारी पूंछ मछलियों से अलग फेज की तरह होती है। हमारे शरीर के अगले भाग में पक्षिमात्र की तरह लम्बा चौधदुग्रा धूपन होता है। शिर में ऊपर एक नासिका होती है जो हमारी नाक है।

**पौराणिक मान्यता** है कि गंगा नदी के आसपास के समूह हमने ही उन्हें बचाने का प्रयास किया है। हमारे शरीर के अगले भाग में दोनो ओर बड़े फिलिफर होते हैं तथा पीछे के भाग में डिस्कना डायलस फिन होता है। हमारी पूंछ मछलियों से अलग फेज की तरह होती है। हमारे शरीर के अगले भाग में पक्षिमात्र की तरह लम्बा चौधदुग्रा धूपन होता है। शिर में ऊपर एक नासिका होती है जो हमारी नाक है।

**व्यापार जायते हैं?**  
हमारी आँखें नहीं होती और हम देख नहीं सकते। शिकार पकड़ने तथा चिरा का अनुमान लगाने के लिए हमने चमगादड़ों के समान विशेष क्षमता होती है, जिसे 'इकोलोकेशन' कहते हैं। हम व्यक्ति तरंगों के माध्यम से शिकार का पता लगाते हैं। हमारा प्रिय भोजन छोटी मछलियाँ हैं। इनके अतिरिक्त हम जौ, घाँसे और पानी के कीटों को भी खाना पसन्द करते हैं। हम नदी के शिकारी जीव हैं। हमें कोई अन्य जीव नहीं खाता है, इसी कारण नदी की खाद्य शृंखला में हम सबसे ऊपर हैं।

**मैं स्वतंत्र हूँ!**  
हमारी लम्बाई के पीछे की नोटी बर्फी भी बस के पीछे हमारे शिकार किया जाता है। हमारी लम्बाई के पीछे प्रकृता होने वाले गहरे जंगल में घुस कर व गहरे पानी में भी हमें सुरक्षा मिलती है। हमारे घर पर भी बहुत से खारे मंत्रा रहे हैं। भारत में हम 1800 से 2000 की संख्या में ही बचे हैं। नदी के बहुत से हिस्से से अब हम लगभग गायब हो चुके हैं। मुझे व मेरे घर नदी पारिवार को बचाने के लिए भारत सरकार में मुझे 5 अक्टूबर, 2009 को राष्ट्रीय जलीय जीव के रूप में घोषित किया है। मुझे बचाने के प्रयास में राष्ट्रीय स्वच्छ गंगा मिशन के द्वारा पर्यावरण शिक्षण केंद्र के सहयोग से शैक्षिक परियोजना संचालित की जा रही है।

**नदियों की रक्षा - मेरी सुरक्षा**

- मेरे पर्यावास नदियों को रक्षित करना हमारे लिए आवश्यक है।
- जंगल काटने नदियों को बचाने का सबसे अच्छा तरीका है।
- मेरे घर के आसपास नदियों को रक्षित करना हमारे लिए आवश्यक है।

## Community Component

CEE team has visited both the proposed locations for identification of project field office. In Bihar, a community project location has been finalized in Bettiah at West Champaran. In Bahraich district of Uttar Pradesh, CEE team has visited different locations and have identified village Baundi of Mahsi block of the district for the office location. With the set up of project field office, CEE team initiated the selection of project villages in both the locations. A team was selected to work in these field offices. They were given orientation about the project and were trained through visit to villages of Gujarat.

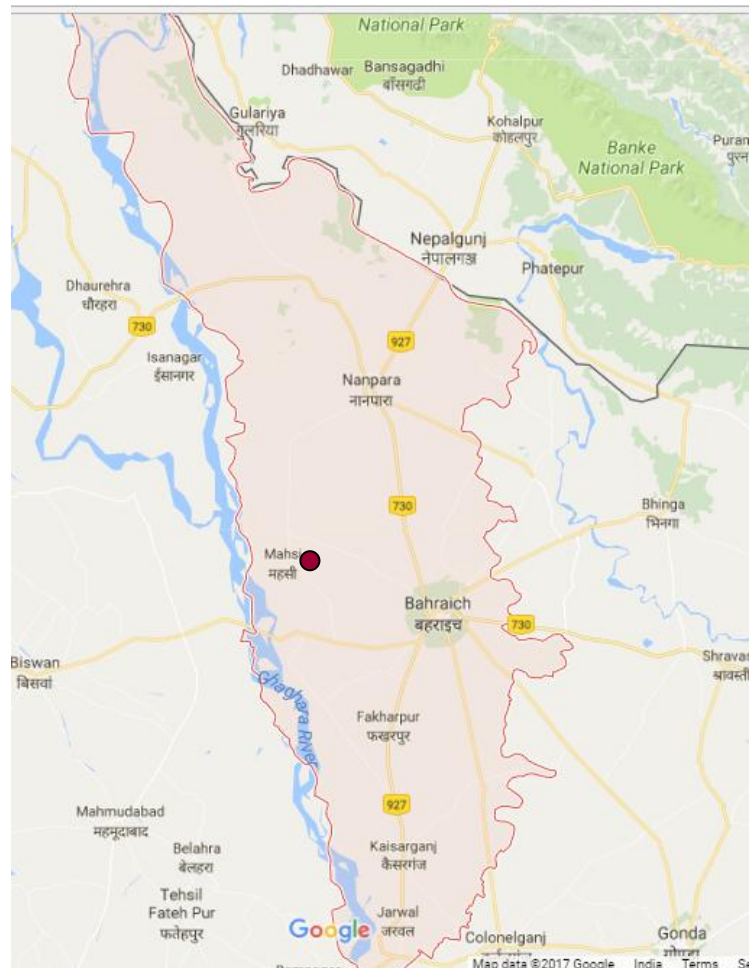

Project villages were identified in both the locations by visiting villages along river. Detailed process of selected has been reported in the second quarterly progress report. Following is the district wise information about project villages:

### Bahraich district, Uttar Pradesh

Sr. No	Name of Village	Block	Name of Gram Pradhan	Contact number	Population	No. of Households	BPL families
1	Baundi	Mahsi	Smt. Rajkumari Devi	9918495004	8600	1720	573
2	Golaganj	Fakharpur	Shri Omkar Singh	7317056086	6000	725	548
3	Kayampur	Mahsi	Shri Dwarika Prasad Pandey	9415625441	3500	600	369
4	Silauta	Fakharpur	Smt. Sumitra Devi	8953181084	2100	300	284
5	Atodar *	Fakharpur	-do-	-do-	4500	700	267

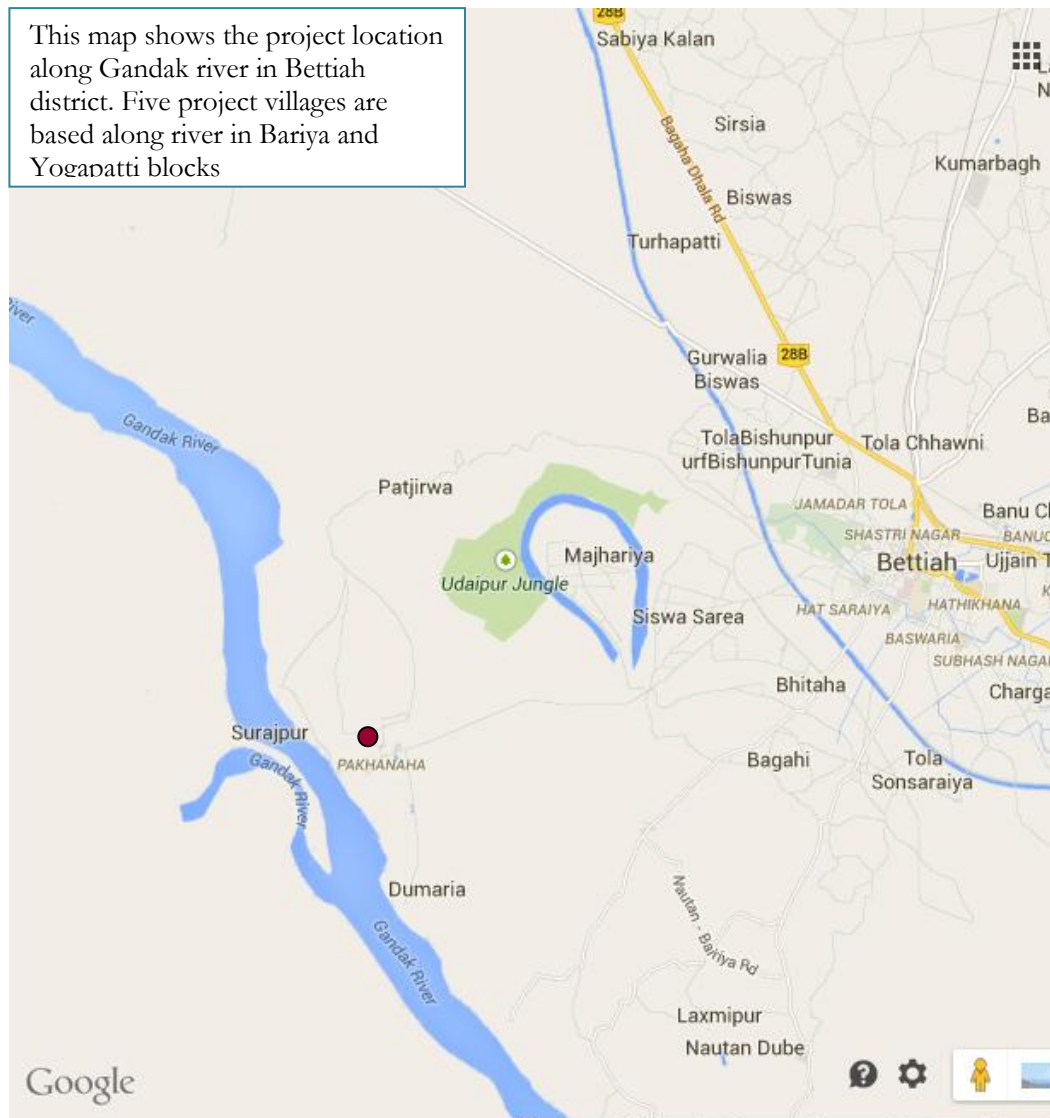

\* Recently Gram Panchayat merged with Silauta with new name Gahrehra Nakdilpur

This map shows the project location along Ghaghra River in Bahraich district. Five project villages are based along river in Mahsi and Fakharpur blocks

## Bettiah, West Champaran

Sr. No.	Name of Panchayat	Block	Name of Gram Pradhan	Contact number	Population	No. of Households	BPL families
1	Pakhnaha	Bariya	Shri Mohan Prasad chaurasiya	9525042045	20000	3000	1600
2	Surajpur	Bariya	Shri Aashish kumar	9534497121	9500	2000	800
3	Uttari Patzirwa	Bariya	Smt Khusbun khatun	9006394847 9122829616	25000	5200	3505
4	Chaumukha	Yogapatti	Shri Hafeej Gaddi	9931235457	11778	2500	1900
5	Bhawanipur	Yogapatti	Shri Nandkishor padit	9934815218	14000	2600	2200

CEE field team at Bahraich and Bettiah conducted detailed survey of the selected villages. With the detailed village survey, a sample household survey was done for fisherman and farmer community to capture socio-economic and ecological situation.

Apart from this CEE team networked with key departments at district (Education, Forest, Development and Administration) and block level. At village level, meetings held with key representatives such as Gram Pradhan, VDC members etc. Apart from this, CEE team met key expert institutions such as National Bureau of Fish Genetic Resources (NBFGR), Nehru Yuva Kendra, Krishi Vigyan Kendra etc.

During the survey, major issues identified in these project villages were poverty, floods, Katan, migration, small landholdings, use of heavy amount of chemical pesticides and fertilizers, lack of awareness, poor sanitation, open defecation etc. Team found issues related to the farming and fishing which directly or indirectly was affecting the river biodiversity. Team had identified the key areas for interventions that are Agriculture, Fishing Practices, Community Sanitation, Personal Health and Hygiene, Open Defecation, Animal Husbandry, and Livelihood improvement.

Major issues observed in agriculture were low productivity and income, lack of information about new techniques, high risk of flood, poor access of govt. schemes, no prevention and control on disease and PEST and availability of finance.

Following interventions planned for the project village based on survey findings and need assessment:

- Boundary and Agro forestry Plantation
- Introducing new crops in terms of risk reduction of flood and better income
- To promote organic farming practices by introducing composting practices, bio-pesticides and other farming techniques
- Providing information and trainings for sustainable farming (organic fertilizer, pesticides)
- Possible market linkage and value addition
- To provide access to quality seeds, and
- To encourage farmers to avail loans from banks rather than local money lenders.
- To introduce community with government schemes and programmes
- To demonstrate alternate energy source for lighting and cooking
- To promote sanitation and hygiene practices
- To aware about disaster risk reduction etc.

## 2.2.1 Consultation and Awareness Programmes

With the selection of village, CEE team conducted meetings and consultations. Various groups in the community like fisherman, farmers, artisans, occupation, elder, women and youth were approached for consultations and building understandings on project initiatives. For need assessment, participatory rural appraisal was done. Series of orientation meetings in each project village was also conducted. CEE expert team from Gujarat also visited villages and interacted with community to understand the ground realities and to finalize interventions for the project locations.

Meeting with community member of Golaganj village.

Meeting with village member of Kayampur regarding the issues of village.

Community meeting in Patjirwa, Bettiah for formation of Souns Sanrakshan Samiti

Orientation meeting and Rapport building on Dolphin project in Pakhnaha, Bettiah

Discussions were done for the formation of Ganges river dolphin ‘*Soums*’ Conservation Committee in each project village and further sub common interest groups as farmers and fisherman. This committee was a decision making body which played advisory role with PRI and local development bodies. This committee decided on the plan of action and helped in identifying beneficiaries for demonstration and capacity building. Apart from this, community focused events were organized on the occasion of international biodiversity day and environment day.

### Awareness Events

Location of event	Purpose	Date	Details
<b>Bahraich</b>			
Raja Baundi	World Environment Day	5 June 2014	Community meeting
Raja Baundi, Golaganj, Kayampur, Silauta, Atodar villages	International Biodiversity Day - Green Wave Campaign	22 May 2015	Awareness Event and Plantation of Guava, Karunda, Litchi and Jackfruit saplings
Raja Baundi village	World Environment Day	5 June 2015	Seminar, plantation and pledge
Silauta and Kayampur village	World River Day	27 September 2015	Rangoli on riverside and awareness meeting
Dolphin villages	World Environment Day	5 June 2016	Community awareness meeting
Riverbank of Baundi and Silauta villages	World River Day	25 September 2016	Visit to river bank, combing, pledge
<b>Bettiah</b>			
Schools of dolphin villages	International Biodiversity Day - Green Wave Campaign	22 May 2015	Awareness Event and Plantation of Guava, Mango, neem, litchi and other saplings
Bettiah	World Environment Day	5 June 2015	Workshop and Media Interaction
Pakhnaha	Independence Day	15 August 2015	School and community interaction through rally on sanitation
Patjirwa	Earth Day	22 April 2016	Plantation of bio-shield plants (Pipal, Pakad, Gular, Banyan, Bamboo)
Pakhnaha	International Biodiversity Day	22 May 2016	Awareness event and plantation of Mahogani , Bottle Brush, Arjuna, Gulmohar, Neemkaudi, Sagwan, Pipal and Pakad

Glimpse of awareness events and community meetings in both the locations.

Community members, youth children observe World River day on the river bank at Bahriach  
*Final Report (Mar 2014 - June 2017)*

## 2.2.2 Capacity building and skill development workshops

Based on needs emerged from consultation and baseline, CEE team facilitated capacity building programmes in both the project locations. Members for training/exposure visit was selected through Souns Sanrakshan Samiti meetings with the assistance from youth volunteer and also committee helped in identifying representatives from all five project villages. Expert institutions were identified and networking was done to organize visit or capacity building programme. Table below enlist types of trainings and capacity building programmes organized for community members under project:

### Details of trainings and exposure visits

Sr. No.	Location	Trainer/Training Institute	No. of Participants	Date of training	Topic of training
<b>Uttar Pradesh</b>					
1	Bicchia, Katerniaghat, Bahraich	DEHAT	20	22-23 June 2015	Exposure visit cum training on organic farming
2	Kayampur Panchayat	CEE expert	17	12 August 2015	Community based disaster risk reduction
3	Dolphin project village	CEE expert	166	5-8 January 2016	Organic farming techniques
4	Saraswati Shishu Vidya Mandir, Raja Baundi village of Bahraich	Krishi Vigyan Kendra (KVK)	222	30-31 May 2016	Training cum Capacity Building of Farmers on Organic Farming and Improved Animal Husbandry
5	Conference Hall of KVK	Krishi Vigyan Kendra (KVK)	50	13 June 2016	Convergence meeting for KVK scheme NICRA
6	Government Highschool, Rajabaundi, Bahraich	CEE Expert	53	22 July 2016	Disaster Risk Reduction (DRR) Training and Mock drill
7	FETC, Colonelganj, Gonda UP	Fisheries Entrepreneurship Training Centre (FETC)	45	11-12 August 2016	Training cum Capacity Building on Pisciculture
8	CEE Bahraich field office	Krishi Vigyan Kendra (KVK)	45	25 November 2016	Linkage to government scheme - NICRA for improved seed varieties and farming techniques
9	Hamlet of Baundi and Silauta, Fakharpur, Bahraich	CEE Team based on UNDP training	42	11-12 April 2017	Panchgavya Mixture Preparation Training
		<b>TOTAL</b>	<b>660</b>	16 days	
<b>Bihar</b>					
1	Patjirwa, Bettiah	Central Bank Rural Self Employment Training Institute	31	22-27 June 2015	Organic based vegetable cultivation and nursery development with bank

		(Cent-RSETI) Bettiah			linkage
2	Dolphin villages	Shri Giridhari, Progressive Farmer	20	19-23 November 2015	Farm field training - vegetable farming linked with distribution of seeds
3	Chaumukha, Patjirwa, Pakhnaha villages	CEE expert	50	13 January 2016	Mushroom Cultivation training for women group
4	Madhya Vidyalaya, Kalya Sthan, Bettiah	Central Bank Rural Self Employment Training Institute (Cent-RSETI) Bettiah	32	10-15 March 2016	Animal Husbandry and Dairy Farming
5	Forest Resource Centre, Udaipur Wildlife Sanctuary, Bettiah	Forest Department and local experts	40	5 June 2016	Workshop cum Training on “Role of Agro Forestry in conservation of Environment, Biodiversity and Habitat of Ganges River Dolphin
6	Community Hall, Patjirwa, Bettiah	CEE Expert	87	3 August 2016	Disaster Risk Reduction (DRR) Training and Mock drill
7	Panchgavya mixture preparation training at Pakhnaha and Patjirwa	CEE Expert	33	23 January 2017; 10 February 2017	Training cum demonstration of making mixture of panchgavya as bio-pesticide and its application
8	Badhaharwa, Chaumukha, Bettiah, West Champaran	Mr. Sarabjeet Sahni, Pisciculture Expert	33	25 February 2017	Promoting inland fisheries (pisciculture) along Gandak river
		<b>TOTAL</b>	<b>326</b>	22 days	

Over 10 farmers and youth volunteers from dolphin villages of Bahraich and Bettiah attended National level Training Workshop on Composting and Smokeless Cook-Stoves on 17-18 March 2016.

Exposure visit of farmers of Bahraich location to DEHAT agency for observing organic farming and other vegetable farming techniques

Meeting cum orientation for farmers on alternate livelihood options and government schemes in Bettiah

Training on DRR for youth in village of Bahraich by CEE team

Six days Capacity Building on Anima Husbandry by RSETI in Bettiah

Biopesticide making process training at Bahraich by CEE team

CEE Bettiah team conducted field training on farming techniques with farmers for vegetable farming

Village wise training was organized in Bahraich for farmers on organic farming practices in January 2016

Training was organized in Bettiah for women members on mushroom farming in January 2016

CEE Bahraich organized two days "Training cum Capacity Building of Farmers on Organic Farming and Improved Animal Husbandry" on 30-31 May 2016 in collaboration with Krishi Vigyan Kendra

### 2.2.3 Demonstration of Alternate Livelihood Options

During baseline survey and meetings, it was observed and expressed by community that there is need to introduce alternative options which help them adopt practices which are river friendly. As part of project interventions, CEE team visualized few demonstrations to help farmers and fishermen to adopt alternative options for their livelihoods and life. With the help of Souns Sanrakshan Samiti, beneficiaries were identified and introduced to new techniques of sustainable options through different programmes. Various interventions introduced were vermi-composting units, backyard vegetable farming, energy options, organic riverbed farming, sanitation related initiatives etc.

#### Bahraich

Sr. No	Demonstration of intervention in number of villages	Description of support	Year	No. of Beneficiaries	Outcome and Results
1	Vegetable Seeds for backyard and farms (1)	Seeds of Bottle Guard, Okra, Chili, Brinjal, Pumpkin	April 2015	16	Community showed interest for improved seeds and used vegetables in their home
2	Vegetable Seeds for backyard farming (5)	Seeds of Tomato, cabbage, cauliflower, radish, carrot and pea; Onion and garlic	Nov. 2015	29	More people joined and started showing interest in adopting in alternative farming techniques
3	Backyard, farmland/ riverbed (5)	Seeds of Cucurbits (Lauki, Kaddu, Kheera, Kakdi, Torai, Karela) and lady finger, Chili, Radish	Feb & June 2016	119	Very encouraging results which helped farmers to raise their income by selling products in market
4	-do-	Seeds of Pea, Chili, Cabbage, carrot, spinach, beet root, Onion	Oct 2016	71	Good quality production was observed in field
5	-do-	Cucurbits (Lauki, Kaddu, Kheera, Kakdi, Torai, Karela) and lady finger , Ocra	2017	105	48.5 bigha was used to sow these seeds following organic method. Production was high in quality and gave good quantity. Products were sold in local market where farmers/fishermen got good price value.
4	Riverbed farming (3)	Seeds of Muskmelon and water melon recommended by CSIR	Jan 2016	25	48.5 bigha areas were used to grow melons. Produce was used by farmers for selling in local market and for their own consumption
5	-do-	Seeds of Muskmelon and water melon of indigenous variety	Nov 2016	26	78 bigha of river side was covered where farmers got good production. Followed organic methods, thus products for

					chemical free.
6	Banana plants (1)	300 tissue culture saplings (G9) from Biotechnology park	2016	3	190 saplings survived and gave good results. Out of these 100 plants had 180 bananas on one plant. Farmer has used only compost in the plants.
7	Fruit and Ornamental Trees (5)	Saplings of 100 plants of Mango, Gulmohar, Kadamb, Neem, Satparni, Kachnar; 25 plants Guava, Jackfruit, Karaunda, Litchi, Aam and 534 plants of Mango, Guava, Lemon, Pomegranate & Aonla were distributed (659)	May 2015; Aug 2015; April 2017	92	Plants are surviving well and are adding value to the ambience. Community is happy to have plants which will also hold soil during floods and provide fruits in 2-3 years.
8	Bioshield plantation (5)	Bamboo plants 89 saplings	2017	52	On riverside farms these saplings were planted to help in reducing havoc of floods
9	Vermicomposting Units (5)	Construction of pits Size: 7ft X 3 ft X 2 ft Model: Recommended by KVK and NABARD Shade: Thatched roof supported by bamboo rafters and purlins Earthworm species: <i>Eisenia fetida</i> Support provided for masonry, cement and mason, earth worm Contribution by beneficiary: Labour, bricks, sand, dung	2015-17	62	Compost from a pit can be taken in 3 rounds in quantity of 5-6 quintal each time. 1 quintal is sufficient for 1 bigha land. Farmers used their compost in their fields. Market rate for total annual production 15 quintal is @ Rs. 15000-25000. Quality of compost is good as farms are showing healthy plants and products. Farms where compost was used got fewer diseases. It also required less water for irrigation.
10	Bio pesticide (3)	Panchgavya Support provided for drums and one time material	2017	6	30 litres of bio-pesticide gets ready in 15-20 days which could be used. 3 litre of prepared mixture needs to be mixed with 100 litres of water and can cover 1 acre area for spray.
11	Solar Lantern (5)	Solar panel and lantern with mobile charging option (Mitwa - MS 352 model) Contribution by community Rs. 800 per lantern and rest 1003 was from project support	2016	30	People found lantern very useful as electricity supply is bad in the area. They could use solar lanterns to monitor their farms, charge their mobiles and women could cook meals in the light of lantern. More such units were in demand.
12	Smokeless Chulha	Sarala Stove Mould	2017	20	40 per cent less use of wood

	(4)	(recommended by IIT Delhi)			dung cake; time saved in cooking and smoke free environment
13	Poultry (5)	400 chicks were provided - 10 to each family	2017	40	Alternative income source was provided to fisherman where each chick will be of Rs. 700 value on sale after maturity in 3 months.
14	Community Sanitary Complex (1)	1 unit of 3 seat raised platform toilet was constructed along water and solar light supply	2017	40	Over 40 families (6-7 members in each family) living around that area were benefitted with this community toilet complex. As there are no toilets in the area
15	Community dustbins (1)	3 community dustbins of 630 litre were installed in market area	2017	100	All waste generated from shops now go into dustbin which keeps the place clean.
16	Climate resilient farming (1)	Improved seeds provided by Krishi Vigyan Kendra with support from dolphin initiative - paddy, dhaincha (green manure), sundan charry (fodder), Wheat, Mustard, Onion, Lentil, Yellow Pea, Barseem (Fodder)	June & Nov 2016	684	Seeds along with training and on farm guidance helped farmers in getting better results. Compost was used in the farms. Production increased by 60 per cent in farms which provided additional income to beneficiary.
17	Pisciculture in Pond (1)	Fish seedlings were introduced in local pond	Dec 2015	1	Being flood plain, water aquifer of that pond reduced as water level went down in rivers. Thus fishes could not survive. Filling of water was required through artificial methods which was costly affair.
		<b>TOTAL</b>		<b>1521</b>	

Vegetable seeds distribution to farmers and fishermen for backyard and riverbed farming

Riverbed farming of muskmelon and water melon along with sunflower by farmers and fishermen

Distribution of bamboo saplings and plantation fruit tree in the dolphin village by community members

Compost pit in use and good quality compost ready for use

Tissue culture Banana plants planted and farmer is delighted to see results of his labour

Distribution of desi variety of chicks as alternative income option to fisherman

Preparation of Panchgavya mixture

Community led toilet construction and final ready unit with painting

Community dustbin installed in market area to ensure cleanliness in the village roads

Making smokeless chulha through mould and usage of chulha by women from the dolphin village

Use of solar lantern by a child in a beneficiary's family and lantern panel being charging by women

Glimpse of result of climate resilient agriculture in dolphin villages

## Bettiah

Sr. No.	Demonstration of intervention	Description	Year	No. of Beneficiaries	Results
1	Vegetable Seeds for backyard and farms (5)	Seeds of pointed gourd, onion, cauliflower, potatoes, tomatoes and other	Nov 2015	26	This was initiated as entry point activity to help community to grow good quality vegetables and improvise their health
2	Vegetable Seeds for backyard farming (5)	Tomato, cabbage, cauliflower, radish, carrot and pea	Nov. 2015	8	Promoted organically grown vegetables with quality seeds with no investment on pesticide and less requirement of water
3	Papaya plant saplings (5)	Ranchi dwarf variety was provided to beneficiaries. Care and maintenance was done by the beneficiary	Sept 2015	500	Due to immediate rains, many plants could not survive. Presently over 50 percent plants are surviving and started bearing fruits.
4	Riverbed farming (4)	Seeds of watermelon, muskmelon, cucurbits	Jan-Feb 2016	20	Production was encouraging which was consumed by beneficiaries and was also sold in market. Added income benefit for BPL families
5	-do-	Seeds of watermelon, muskmelon, long melon and pumpkin and cucumber. Care was taken by beneficiary.	Nov 2016	56	More people joined in growing riverbed crops following organic methods. People started seeing this as alternate income source.
6	Biopesticide Unit (5)	Matka rasayan and Panchgavya Support: Drum, Raw material Contribution: Cow dung, Cow Urine	2015: 2017	20	Prepared mixture was used by farmers in their field which is saving cost and also giving health crops
7	Vermi composting unit (5)	Compost pits were constructed Size: 6ft X 3 ft X 2 ft ; NABARD guidelines Support: bricks, cement, earth worms Contribution: Sand, Labour, agricultural residue, cow dung	2016; 2017	30	Production from compost pit is 3-4 quintal which is 3 times a year. Farmers are finding it economically sound as it has added benefits of less diseases to plants and reduction in use of water for irrigation
8	Mushroom cultivation (3)	Two species were introduced for mushroom cultivation - Button mushroom ( <i>Agaricus bisporus</i> ); Oyster	Jan 2016	5	Women members were involved in producing mushrooms, thus income generated from selling it is helping them to be

		mushroom ( <i>Pleurotus ostreatus</i> ) Support: Spawn, plastic bag Contribution: Raw material and installation, care			independent. Production: 1 packet 2.5 kg similar 6 packets were used. The market rate of 1 Kg mushroom is Rs. 150/-.
9	Agro forestry and bioshield plantation (4)	Provided saplings of Mahogani (82), Jamun (82), Guava, Poplar plants through Hariyali scheme of State Government to 18 families (20000)	2016; 2017	100	Saplings were provided to BPL families of fisherman community. Plants will not only support with fruits but will act as bioshield
10	Animal husbandry (5)	Facilitated linkage to government scheme of KVK and RSETI to dolphin villages	2016	19	Beneficiary families started rearing more than 30 cattle (cow & buffalos)
11	Solar lanterns (5)	Solar panel and lantern with mobile charging option (Mitwa - MS 352 model) Contribution by community Rs. 800 per lantern and rest 1003 was from project support	2017	30	Lanterns help members of family to complete their work. Thus work has become easier in their daily routine. More people now want to purchase this lantern.
12	Smokeless chulha (5)	Sarala Stove Mould (recommended by IIT Delhi) Support: Sieve, Pipe Contribute: Clay for making	2017	25	No smoke, less cooking time, less wood/dung cake required is some benefits community has got by adopting this chulha. Women find more time now for other creative work and feel much better in smoke free environment.
13	Sanitation - Individual household latrines (5)	Individual toilets as per State government approved designs and norms have been constructed in consultation with district officials Support : Bricks, Cement, Mason, labour, Sand, Toilet, Cemented Water Tank , Tap	2017	30	Fisherman community from BPL was benefitted with individual toilets. Many families were motivated to take government subsidy to construct toilets in their home. Sanitation has helped reduce expenses of family on medications. Community members feel comfortable in using this toilet as design is user friendly and quality of construction was ensured.
14	Poultry (5)	Distributed 4-4 chicken (poultry) in the ratio of 3:1(3 female and one male)	2017	30	Fishermen community from BPL background has got additional income source which will give return in next 3 months
		<b>TOTAL</b>		<b>899</b>	

Demonstration on making of bio-pesticide for vegetable crops using Gomutra, Behaya, Madar, Neem, Bhang, Dhatura and local grass was shown by CEE team

Farmers were given orientation

Plantation of papaya saplings in backyard and farms.

Farmers with production from riverbed farming

Distribution of Jamun and Mahogani saplings for plantation

Individual toilets in dolphin villages for BPL beneficiaries

Discussion with fishermen community and distribution of chicks for poultry

Smokeless chulha mould for making stoves

Solar lanterns distributed to community

Women members were given training and spawn for mushroom culture

Compost pits constructed in dolphin villages and manure ready after process

Bamboo plants planted by community and training of members about care of plants

Demonstration of preparation of Panchgavya mixture for use in farms

Vegetables ready for use from backyard farming

## 2.2.4 Dolphin School - Community Interface

As part of this activity in the project, the interaction between school and community was planned. It was envisaged that in year 2 and 3, an event as dolphin camp cum mela will organized getting various schools from their cluster on a sight to showcase their work to community.

### First Dolphin Camp cum Mela

The event was organized on 12<sup>th</sup> and 13<sup>th</sup> April 2016 at Katerniaghat wildlife sanctuary. More than 200 children from 28 Dolphin schools of different dolphin cluster of UP and Bihar, schools from dolphin cluster of Katerniaghat, Mahsi(Baundi), Jarwal Road, Gonda, Meerut, Varanasi, Allahabad of UP and Begusarai, Bettiah, Bagaha, Muzaffarpur, Gopalganj, East Champaran, of Bihar attended the camp cum mela. More than 100 tharu community members, fishermen, forest officials, teachers, government officials and other key stakeholders were also taken part in the event. In total, more than 300 participants have visited to mela. All participants had participated in different competitions like exhibitions, Painting, Rangoli, Quiz, and Essay writing.

## Second Dolphin Camp cum Mela

Next round of “Dolphin Mela cum Camp” held on 24<sup>th</sup> and 25<sup>th</sup> April 2017 at Valmiki Tiger Reserve, Division-2, Forest Department, West Champaran. The main objective of event was to share learning and experiences through showcasing informative exhibitions on conservation of Ganges River Dolphin, biodiversity, forest, river and environment. In the event, more than 300 children from 38 Dolphin schools of different dolphin cluster of UP and Bihar, schools from dolphin cluster of Mahsi(Baundi), Jarwal Road, Gonda, Varanasi, Allahabad of UP and Saran, Bettiah, Bagaha, Muzaffarpur, Gopalganj, East Champaran, of Bihar were taken part. More than 75 tharu community members, fishermen, forest officials, teachers, government officials and other key stakeholders were also taken part in the event. In total, more than 375 participants have visited to mela. All participants were participated in different competitions like exhibitions, Painting, pebble painting and quiz competition

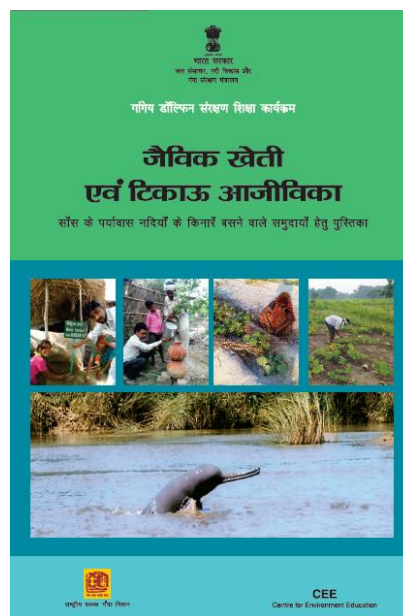

Glimpse of Dolphin camp cum mela - nature trail, exhibition, dolphin game, prize distribution

## 2.2.5 IEC Material for Community

A set of educational material was designed and developed focusing requirement of community. Following material was developed and disseminated:

Sr. No.	Type of IEC Material	Total number and Language	Target Group	Year of development
1	Dolphin project medium size board for 10 project villages	10 in Hindi	Local community leaders, media, visitors etc.	2014
2	Dolphin Awareness Display Poster	1000 in Hindi	Local community, panchayat members, officials, media	2014
3	Organic Farming and Sustainable Livelihood booklet	1000 in Hindi	Local community, NGOs, officials, institutions, etc.	2017
4	Dolphin Project film	In English and Hindi	For schools, community, viewers, officials etc.	2017

## 2.2.6 Ecotourism

Ecotourism has been very significant in promoting responsible tourism in the protected areas, tourists are encouraged to tour natural areas with following certain code and conducts, which also promote conservation along with economic benefits to residing communities living in or nearby to the protected areas. In India, there are many natural areas, which are filled with natural beauty and adventures to experiences the activities of wildlife roaming inside of protected areas. Ecotourism is now becoming good trend for tourist to experience and feel the joy of rivers, forest, mountains, ice, wildlife, amazing flora and fauna, aquatic life etc. Such types of ecotourism provide economic benefits to tribal communities and also encourage them to conserve the nature and its heritage. Under the project two locations for promoting Dolphin specific ecotourism were identified. These sights are Katarniaghat Wildlife Sanctuary, Bahraich in Uttar Pradesh and Valmiki National Park (also known as Valmiki Tiger Reserve), West Champaran in Bihar.

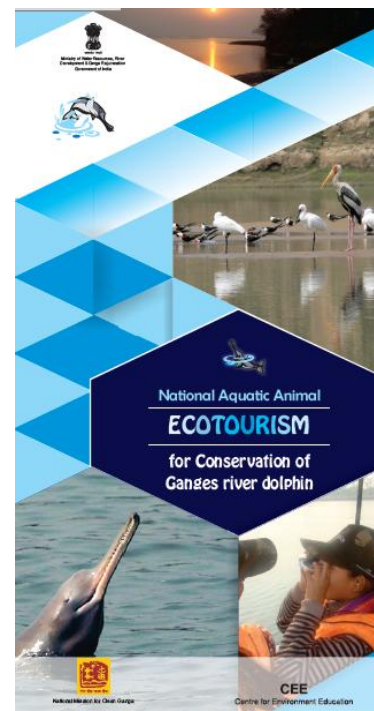

### **Dolphin Nature Camp of Bettiah School Cluster**

A two days camp was organized for dolphin schools on 07-08 Dec 2016 at Valmiki Tiger Reserve, West Champaran. Total 36 students from 8 dolphin schools of Bettiah and Bagaha were taken for 2 days camp.

## Dolphin Nature Camp of Bahraich School Cluster

Another nature camp was conducted at Katarniaghat wildlife sanctuary for Bahraich cluster dolphin schools from 2-3 March 2017 where 20 students and 2 teachers joined.

## Ecotourism Brochure

To promote dolphin focused ecotourism, a brochure has been developed in English for various stakeholders as part of the project.

## Ecotourism Boards cum Panels

Two wildlife sanctuaries were identified as potential site for promoting dolphin ecotourism each in Uttar Pradesh and Bihar. Local community youth were selected for discussion on becoming ecotour guide. Information related to species was shared. Safety related equipments like safety jackets, torch etc. were procured and provided at the sites. To aware tourists coming to sight about aquatic biodiversity and national aquatic animal, a set of information signages were developed to install outdoor in these sanctuaries. In consultation with Forest Department, these boards were installed. A set of five boards were developed covering information on sanctuary, aquatic species and code of conduct for ecotourists.

Ecotourism panels installed at Katernighat Wildlife Sanctuary, Bahraich on different points for visitors

Ecotourism panels installed at Valmiki Tiger Reserve, West Champaran on different points for visitors

## 2.2.7 Youth Volunteers

From both the project locations, youth volunteers were selected and engaged to facilitate local community and schools on conservation efforts of Ganges River Dolphin and its habitat. These volunteers were given orientation about various threats to river and its biodiversity. A two days training was conducted for the volunteers to help them understand project. The youth volunteers were networked with key departments and individuals. Each youth volunteer was equipped with certain basic resource kit including cap, bag, brochures, badges, diary, stationery etc. Each volunteer was initially paid Rs. 1000 per month and later increased to Rs. 1500 towards the cost incurred for communication and local transport. Total 11 youth volunteers were working on the project at village level.

### Bahraich

Sr. No.	Name of Village	Block	Name of youth volunteer	Contact Number
1	Baundi	Fakharpur	Mr. Dinesh Kumar Tiwari	9161739254
2	-do-	-do-	Mr. Vivek Tiwari	9648150771
3	Golaganj	Fakharpur	Mr. Kanhayi Prasad	7317056054
4	Kayampur	Mahsi	Mr. Ramanuj	9454996365
5	Silauta	Fakharpur	Mr. Deenanath Verma	9670111924
6	Atodar	Fakharpur	Mr. Bhagauti prasad	7897707798

### Bettiah

Sr. No.	Name of Panchayat	Name of block	Name of youth volunteer	Contact number
1	Pakhnaha	Bariya	Sunil Thakur	8210271231 9570572941
2	Surajpur	Bariya	Ajeet Kumar	7277218078 9525463076
3	Uttari Patzirwa	Bariya	Giridhari Ram	8340724092 8084028866
4	Chaumukha	Yogapatti	Harendra Yadav	9006696273
5	Bhawanipur	Yogapatti	Sanjay Thakur	9135080321 8757158258

There were youth volunteers who got job or other opportunities; those were replaced with new volunteers who were given orientation. All volunteers met with CEE team on monthly basis as pre decided date of the meeting. This helped in taking feedback and preparing action plan of coming month. These volunteers were from project villages thus they acted as motivators to encourage people to take up alternate activities.

## Engagement of Youth Volunteers in following activities of Dolphin Programme

SN	Programme activities	Task, assigned by Youth Volunteer
01	Strengthening Souns Sanrakshan Samiti (SSS)	-rapport building with community, follow up of local community and consultation on Dolphin programme -Formation of Souns Sanrakshan Samiti, selection of representatives of the committee -Organizing monthly meeting of Souns Sanrakshan Samiti -Strengthening and capacity building of representative
02	Planning and reporting	-regular monthly meeting at Field office of Bettiah conducted -the recommendation and concerns of Project volunteer is included in the planning of project activities
03	Field Demonstration on Vegetable cultivation	-selection of beneficiaries as per norms and criteria -maintaining transparency in selection process of project beneficiaries -regular field visit in farm field of beneficiaries for handholding support
04	Training and capacity development initiatives	-support in selection of beneficiaries for organic based vegetable cultivation, currently beneficiaries for Mushroom and Pisciculture training are being identified and selected -Support and coordination in organizing the capacity development trainings
05	Vermi-compost pit Installation	-Selection of beneficiaries for installation of Vermin pit -Support in installing process of vermin Pit
06	Dolphin Board Installation	-Support in selection of location for Dolphin board installation
07	Youth sensitization	-Facilitating youths on Dolphin Conservation
08	Women Strengthening	-women are mainstreamed through SSS and project intervention

### Shri Deenanath Verma

He joined as volunteer in the dolphin programme in 2014 from village Silauta. He has passed intermediate and due to financial situation of his home he has to leave his studies in between to start earning. He says his way of thinking changed after joining dolphin initiative and various trainings offered by Centered. He says that he wants to not only find alternative income sources for him but would also like to help his people in the village. As volunteer, he facilitated discussions at village level and convinced people to try out new farming and fishing techniques. He was concerned about the fact that during floods and also in normal time, women face lot of problem as there is no toilets. When CEE started discussion in his village on sanitation and need for a community toilet emerged, he readily offered his land for constructing the toilet. His contribution of land is now benefitting members of 40 families. A committee is formed to ensure its cleaning and maintenance. The District Magistrate visited village to inaugurate the toilet and he appreciated Mr. Verma's effort. He will be given an appreciation certificate by DM, Bahraich. He is now inspiration to several youth in the village.

### Shri Giridhari Ram

Mr. Ram became part of dolphin programme as volunteer in 2015. He is a progressive farmer in his village Uttar Patjirwa. Trying out different methodologies and visiting to various institutions is his interest. He himself practices composting, preperation of bio-pesticides, mulching, machan farming etc. He decided to join dolphin programme to replicate these ideas in the area among community. Mr. Giridhari ji is respected person in the village and with the role of volunteer he became messenger for conservation of dolphin and rivers. After attending CEE's training programmes, he took initiative and conducted hands on trainings for community members. He says he will continue his work in villages around his area to get more people join organic farming movement.

Youth Volunteer's Training and review meeting on building understanding aquatic biodiversity and concept of sustainable villages

Monthly youth volunteers meeting at field office to share updates and plan for coming month

## PROJECT OUTPUT & OUTCOME

The Ganges River Dolphin Conservation Education Programme was implemented in Ganga basin during thirteen quarters starting from March 2014 till June 2017. The project could achieve its objectives as envisaged in the proposal. Below is the table showcasing output under each activity:

Sr. No.	Objectives	Envisaged Activities	Output and Results
1	To conduct Ganges river dolphin conservation education activities in schools at 20 locations in Ganga river basin.	<ul style="list-style-type: none"> <li>• Orientation-cum-Review meet of stakeholders and annual meets</li> <li>• Identification of 700 Schools and formation of 20 dolphin school cluster</li> <li>• Teachers Training workshop for 700 teachers and Annual Review Workshops</li> <li>• School Cluster activities including annual awareness campaign (2 events in a year in each cluster) and monitoring of activities</li> </ul>	<ul style="list-style-type: none"> <li>• Conducted 3 rounds of meet annually for project partner NGOs</li> <li>• Total 747 schools enrolled in the programme from 20 clusters 10 each from UP and Bihar. Formed dolphin club with over 30000 children.</li> <li>• Teachers training were done for 731 teachers. Over 1020 teachers participated in annual review workshop.</li> <li>• Over 2-3 cluster events done annually where more than 18000 children participated</li> </ul>
2	To develop and disseminate educational and awareness promotion materials for schools and different stakeholders.	Programme Brochure (2), Exhibition panels (2 sets), Revised book and Poster (1), Calendars (2) and Planners/chart(1), Badges, Caps, T shirts (1000) etc.	Developed and disseminated IEC material as envisaged. Stickers and badges from earlier phase were used for dissemination.
3	To develop a Ganges river dolphin Education Resource Centre at each of the 20 locations.	Setting up Ganges river dolphin education resource centres	The dolphin education resource centre was identified in all 20 school clusters and educational resources were provided for the centre
4	To raise awareness among non-dolphin location schools about national aquatic animal and conservation of its habitat.	Organize events in 3 non dolphin locations for schools to spread awareness	Conducted 3 events in non dolphin location where 570 students took part from 59 schools
5	To network with key institutions,	Meeting and consultations with key departments and institutions	Due care was taken to spread the information about the

	departments and religious groups for raising awareness about required conservation actions for national aquatic animal and its habitat.		project through brochure and dolphin calendars to inform and involve various stakeholders in the programme. Details have been mentioned in each quarterly report.
6	To sensitize farmers and fishing communities about the importance of conserving Ganges river dolphin and rivers for their life and livelihood.	<ul style="list-style-type: none"> <li>To set up field office in both locations</li> <li>To conduct awareness programmes</li> <li>To engage community in the programme</li> <li>To develop and share communication material Poster, Pamphlet and stickers, Dolphin Boards and video film</li> </ul>	<ul style="list-style-type: none"> <li>Field office was established in both the locations</li> <li>Awareness events on environment related days were conducted at village level</li> <li>Souns Sanrakshan Samiti was formed in all project villages and regular meetings were done.</li> <li>IEC material was developed including poster, pamphlets, stickers, booklet, dolphin boards and film</li> </ul>
7	To assess the conservation issues and socio-economic status of communities at two project locations.	Conduct need assessment in 10 villages of both the project location to understand the local situation	Village level survey was done and then household survey was conducted. Through village level PRA exercise, need assessment was done to enlist required actions to be taken in terms of training and demonstration.
8	To build capacity of farmers and fishing communities living close to dolphin habitat at selected locations for adopting sustainable farming and fishing practices along with alternative livelihood options.	<ul style="list-style-type: none"> <li>Skill based training programmes (4 in each location) for local communities focusing on sustainable farming and fishing practices and livelihood options</li> <li>Demonstration of sustainable options of agricultural and fishing practices - vermicomposting (40), biopesticides (10), backyard vegetable farming (20-30), solar lantern &amp; chulha (20); Soakage pit (100), alternate oil and pisciculture etc.</li> </ul>	<ul style="list-style-type: none"> <li>In each location 8-9 trainings were conducted which benefitted total 986 community members.</li> <li>Demonstration options were finalized as per the need emerged after discussion: Vermi composting (92), Biopesticide (26), Solar lantern (60), Smokeless chulha (55), Toilet (30 individual + 1 CLTS); Farming vegetable (over 350) riverbed (120); Poultry (70), Banana, Papaya, mushroom, agro forestry etc. Linkage with government schemes has helped community to receive support for</li> </ul>

			plantation saplings and improved seeds for regular cropping
9	To engage youth in promoting eco-tourism activities and volunteering for river and its biodiversity conservation activities.	<ul style="list-style-type: none"> <li>Local youths (over 20) are identified at project location; training; resource kit; monitoring</li> <li>School-Community Interface - River Dolphin Mela-cum-Field Camp (2 rounds)</li> <li>Ecotourism based activities (Camps, material, boards and discussion)</li> </ul>	<ul style="list-style-type: none"> <li>Youth (over 18) at village level were identified and were given training and resource kit. Monthly meeting was done at field office for reporting</li> <li>In year 2 and 3 dolphin mela cum camps were conducted where over 1000 people participated</li> <li>2 sites were identified in both the States for ecotourism promoting; 2 camps were conducted; meeting with local youth; 10 board were installed, brochure was developed and safety aids were provided to youth volunteers</li> </ul>

## Impact and Outcome of Programme

### 1. Reach in Schools

- This programme involved rural schools which mostly are located near rivers. Generally these schools are unreached from any other programmes and opportunities.
- Through this initiative schools residing along Ganga and its tributaries like Ghaghara, Gandak, Son, Saryu etc. were covered.
- Awareness has been raised among school teachers, principals and students of all dolphin schools about river dolphin and other aquatic biodiversity through this programme. Schools reached out in three non-dolphin locations were also made aware about the species.
- Teachers were trained about understanding this unique species, role in river ecosystem and our role in its threatened status and protection. Along with this teachers were guided to use new teaching learning methodologies which helped them to enhance their classroom transaction.
- Children were engaged in using dolphin focused education material and being part of educational activities which helped them understand interdependence in nature.
- Children got opportunity to creatively express their thoughts about their own surrounding especially connecting with river dolphin as mascot.

- Schools have got interactive display material which encouraged student's participation.
- Rally and similar awareness events were regularly organized in the clusters which helped connecting dolphin schools with nearby community with the message of save ganga - save dolphins.
- Students and teachers who got opportunity to represent their cluster in national programmes was an important exposure for school to prepare themselves with good knowledge about species and environment.
- Students were able to identify names of aquatic life such as birds found around rivers, river dolphin, gharial, magar, turtles using IEC material given during programme.
- Media was very keen on reporting about what dolphin schools are doing on various environment days which helped in spreading the word about saving dolphin and its home rivers.
- Camps and visit to river bank for school students helped them to see the situation on their own and they got hands on experience of observing rivers and its biodiversity. Students found themselves very connected to nature especially rivers with such visits which was expressed by them during interactions.
- With annual teachers meet, it provided platform for sharing of experiences among schools helped them to improve on their presentation skills.
- Block level education resource centres were onboard for the implementation of the programme in schools through which awareness was also raised among officials. Even training venues were given by education department in their own premises.

## 2. **Reach of Community Interventions**

- The programme has build better understanding on species of Dolphin in the rivers, how its presence is beneficial to the river and human beings, they have been also able to understand about their role and actions in conservation of Dolphin and rejuvenation of river.
- The socio-economic conditions has been improved of fishermen and farmers groups through the different entitlements and initiatives, the approach of riverside communities has been changed as they got alternative livelihood options through the programme
- Better understanding on environmental and biodiversity issues, learnt skills on how they can take actions for conserving environment and river locally.
- Shifting of livelihood approaches from fishing to farming, better understanding on WASH.
- The concept of sustainable village is understood by community thus they are keen in saving natural resource for future generation.

- There is upgradation of knowledge among community which bring sensitivity towards taking care of soil enrichment, crops requirement and biodiversity around.
- Improvement in skills used for farming and they are now aware about new techniques which reduces cost of input given to any crop in terms of fertilizer, water and pesticide.
- Intensive advocacy was done on sustainable fishing practices where fishermen were advised to catch bigger fishes and leave smaller ones for animals living in rivers and also following seasonal calendar for practicing fishing.
- Sensitization of community members was done towards aquatic biodiversity and its protection which helped raising sensitivity and attachment towards saving dolphins and other aquatic species.
- The Community members of nearby villages who heard about the result of the programme got also interested in the initiative and have asked to extend area of implementation of dolphin programme.
- Boards installed in all project villages have helped build the understanding of the project and how this project is going to help river biodiversity and enhance people's livelihood
- Demonstration of vermi composting process has helped farmers to adopt this method for making compost. Now farmers are confident about use of compost and are now promoting it to other farmers.
- Resource material especially organic farming and sustainable livelihood booklet was useful for farmers as they have started using various methods given in the book.
- Souns Sanrakshan Samiti is promoting conservation issues and advocating for entitlements under different schemes of government. A committee with non-involvement of funds is recognized as advocacy forum by community members.

### **Achievements in Bettiah Project Location**

- Collaborated with Rural Self Employment Training Institute, Bettiah, West Champaran, and run by Central Bank of India and Ministry of Rural Development, (MoRD) for providing training to selected beneficiaries under Dolphin programme. Community got connected to lot of schemes which will benefit them in future as well.
- Collaborated with Agriculture Department and Krishi Vigyan Kendra, Madhopur Distt. West Champaran for technical assistance and guidance in farming which got various agriculture related programmes to reach dolphin villages
- More than 08 beneficiaries linked with banks scheme for Cow Rearing Scheme of Bihar government
- Collaboration with Forest Department for promotion of Agro forestry Scheme of Bihar Government, more than 35 beneficiaries linked with the scheme (More than 20000 plants of mix varieties distributed, survival rate is around 65 percent)
- Collaboration with Red Crescent Society, District Unit-West Champaran for disaster management and relief operation in Dolphin project areas

## Achievements in Bahraich Project Location

- With backyard and riverbed farming demonstration, different vegetable crops and melons were produced covering more than 56 bigha land which was totally cultivated by using organic products. By selling these crops farmers got added extra benefit other than their routine income and got an alternate livelihood.
- Association with Krishi Vigyan Kendra for their climate resilient crop initiative called NICRA (National Innovation in Climate Resilient Agriculture) in one of the dolphin village helped over 200 farmers to get benefit of the scheme.
- Collaboration with Fisheries Entrepreneurship Training Centre (FETC), Colonelganj, Gonda with this project activities was helpful in terms of training of fisherman on various species and methods. Apart from this institute plans to work in field with fisherman in future for few field demonstration of fisheries.
- District magistrate of Bahraich Mr. Ajay Deep Singh-IAS has inaugurated dolphin project supported community toilets and dustbins. He appreciated the quality of work and efforts taken by CEE under NMCG supported initiative in the village. The district authority announced to adopt Baundi dolphin village for making ODF.

## WAY FORWARD

This three year duration project in Ganga basin has delivered some very positive and encouraging responses which become potential reason for continuing such efforts in future to save aquatic biodiversity and their habitat rivers. Schools, community, youth, institutions, media etc. were engaged in the entire journey of the project implementation which has not only shown positive results but have also shown path for future.

The local networking and partnerships helped in working with wider group of stakeholders along with schools. The programme was able to generate interest among government departments, institutions, NGOs, researchers, youth etc. Consultations to bring in local issues such as state of river, biodiversity, livelihood etc could be part of the implementation strategy as this provides an opportunity to everyone to contribute and participate. Networking in the programme was focused on information dissemination while it was felt that networking could take one step forward and build in partnership with other ongoing similar initiatives. Other initiative of NMCG in the basin area focused on awareness generation could build upon or may be networked to get better visibility.

Communication strategy used in the programme was one of the important learning areas which became key factor for the success of the programme. This phase of the programme built on phase I's learning thus it get into next level for school activities. Community, youth and ecotourism related interventions were introduced first time based on other similar efforts of other organizations. These have also shown lot of potential in taking them up at next level. It was strongly felt that youth groups from NSS, NYK and volunteer programme could also be engaged and synergized in such initiatives. Networking with protect areas where dolphins are sighted has huge potential for promoting ecotourism. So far forest focused ecotourism is seen in the country, we could see opportunities in river focused ecotourism.

Similarly there are community driven forest management programmes but with the results from this project shows big possibility in doing community oriented river conservation programmes. As eco development committees are formed, we could look at rivers related stakeholders like fisherman, boatmen, riverbed farming farmers are also engaged. This initiative along river side shows potential of engaging farmers and fishermen community in practicing organic farming methods in vegetable and riverbed farming which becomes an add on income source. Youth of the village was associated in the programme in convincing community to learn and adopt new practices which had created great impact. CEE team has gained trust and confidence of the community members during this project and they are keen that Ministry of Water Resource and Ganga Rejuvenation should continue its support by providing support for some more time. Request from nearby villages have also started coming.

### **Plan for Sustainability of the Initiative**

Outcome from the programme and feedback from stakeholders about the initiative are very positive. One could see change in level of awareness among people about Ganges river dolphin and other aquatic biodiversity. The partner NGOs are feeling confident in running the educational programme and have built their own niche with the help of dolphin initiative in their location. Similarly at village level community has started thinking differently about river and its life. Earlier it was seen as place to just harvest resources and suffer from floods and its effects. Now they know that sustainable harvesting and caring for rivers and its aquatic biodiversity will be very important for them as well.

While schools which have been associated in the programme will be connected with one of the other programme to support them with regular guidance. However, there is great scope to identify new locations and engage new school clusters in this programme. One could take dolphin as mascot for saving river Ganga and its biodiversity.

Apart from schools, it would be quite relevant to engage youth group from local area, NCC, NSS and Nehru Yuva Kendra to take field level action based activities. The community level demonstration projects on organic farming and alternative livelihood, energy options, enterprises, eco-tourism options need to be scaled up and also replicated in other Ganga villages. Standard training programmes could be designed to train farmers about organic farming techniques and alternative options.

## ANNEXURES

### Annexure I - List of Schools

#### Dolphin School Cluster list of Uttar Pradesh

Sr. No.	Name of Location	Number of Schools in the cluster
1	Allahabad	40
2	Bahraich - Jarwal	35
3	Bahraich -Baundi	39
4	Bahraich - Katerniaghat	40
5	Gonda	58
6	Faizabad	32
7	Merrut - Hastinapur	37
8	Bijnore	35
9	Kanpur	37
10	Varanasi	36
	<b>Total</b>	<b>389</b>

#### Allahabad School Cluster list (40)

Sr. No.	Name of Dolphin School and address	Name of Teacher in charge	Contact No.
1	Upper Primary School, Jamunipur, Allahabad	Smt. Asha Singh	9621341942
2	Moti lal Nehru Inter College, Jamunipur, Allahabad	Sri Ramsagar Maurya	9005779125

## पर्यावरण निदेशालय में गंगा नदी में डॉल्फिन बचाने के लिए सेमिनार

# निर्मल गंगा संग चले डॉल्फिन संरक्षण अभियान

**अमर उजाला ब्यूरो**

लखनऊ। जीवनदायिनी गंगा को भी तभी बचाया जा सकता है, जब उसमें रहने वाले डॉल्फिन जैसे जलीय जीव को जिंदा रहने लायक इको सिस्टम मिले। गंगा और उसकी सहायक नदियों में बहाई जा रही गंदगी डॉल्फिन के लिए बड़ा खतरा बन चुकी है। ऐसे में डॉल्फिन संरक्षण अभियान को निर्मल गंगा अभियान के साथ ही जोड़ा जाना चाहिए। इसके अलावा डॉल्फिन की गणना कराए जाने की भी जरूरत है। पर्यावरण निदेशालय, गोमतीनगर में बृहस्पतिवार से शुरू हुए दो दिवसीय सेमिनार के पहले दिन विशेषज्ञों ने यह राय जाहिर की।

सेंटर फॉर एनवायरमेंट एजुकेशन (सीईई) और नेशनल गंगा रिवर बेसिन अथॉरिटी की ओर से शुरू हुए सेमिनार कम वर्कशॉप का उद्घाटन प्रमुख वन संरक्षक (वन्यजीव) डॉ. रूपक डे ने किया। उन्होंने बताया कि हमने 2002 में 18 टीमों के साथ मिलकर डॉल्फिन की गणना की थी। 2700 किमी नदियों के क्षेत्र में केवल 671 डॉल्फिन मिलीं। अब बायोलॉजिकल डायवर्सिटी सर्वे करने की जरूरत है। इसमें जलीय वनस्पतियों के अलावा डॉल्फिन, घड़ियाल, कछुए जैसे जलीय जीवों की जानकारी मिल सकेगी। अगर ऐसा नहीं हुआ तो वह दिन दूर नहीं कि एक भी डॉल्फिन जिंदा न रहेगी।

उन्होंने बताया कि चारणसी में लोग श्रद्धा के नाम पर गंगा में स्नान करते हैं। वहां दो दर्जन से अधिक नाले सीधे गंगा में गिरते हैं। नहाने में मुंह खोल दीजिए तो लाखों खतरनाक बैक्टीरिया शरीर में चले जाएंगे। वहीं, यमुना नदी का हाल ऐसा है कि वह दिल्ली से निकलते ही बायोलॉजिकल मृत हो जाती है। गंगा को साफ करने के साथ डॉल्फिन को बचाने के प्रयास करने होंगे, क्योंकि दोनों एक दूसरे से जुड़े हैं। किसानों को कृषि तकनीक समझाने के अलावा इंडस्ट्रियल और सालिड वेस्ट को भी गंगा में गिरने से रोकना होगा। कार्यक्रम में सीईई की रीजनल कोऑर्डिनेटर प्रीति कनौजिया, कार्यक्रम अधिकारी संजय तिवारी, टर्टल सर्वाइवल एलायंस के निदेशक डॉ. शैलेन्द्र सिंह, इस्कोन इटावा से राजीव चौहान मौजूद रहे।

कार्यशाला में बृहस्पतिवार को स्मारिका का विमोचन करती प्रीति कनौजिया, डॉ. रूपक डे, एके पांडे और अनुराग पांडे।

- डॉल्फिन बचाने के लिए उनकी गणना कटाने की जरूरत, अभी तक कोई साइंटिफिक सर्वे नहीं
- सेंटर फॉर एनवायरमेंट एजुकेशन और नेशनल गंगा रिवर बेसिन अथॉरिटी की ओर से हो रहा सेमिनार

कार्यशाला में बृहस्पतिवार को स्मारिका का विमोचन करती प्रीति कनौजिया, डॉ. रूपक डे, एके पांडे और अनुराग पांडे।

### डॉल्फिन को इससे बना खतरा

- घरेलू इंडस्ट्रियल सीवेज
- कैमिकल फर्टिलाइजर, पेस्टिसाइड
- नदियों के किनारे पेड़ों की अंधाधुंध कटाई
- नदियों में पानी की कमी
- मछलियों, यानी खाने की कमी
- नदियों में मोटर बोट की संख्या बढ़ी

### इंसान के नजदीक डॉल्फिन

पर्यावरण निदेशालय के डिप्टी डायरेक्टर अनुराग यादव ने बताया कि डॉल्फिन कोई मछली नहीं है। यह एक स्तनपायी जीव है। यह इंसान की भाषा को सबसे ज्यादा समझती है। इंसानों की तरह ही यह अपने बच्चों को स्तनपान कराती है। ऐसे में भावनात्मक लगाव होना भी जरूरी है। इस समय देश में 1200-1800 डॉल्फिन ही बची हैं।

### गंगा पर बांध बनाने से खत्म हुई डॉल्फिन

देश की एकमात्र डॉल्फिन सेचुरी विक्रमशिला गांगेय डॉल्फिन न अभ्यारण्य, भागलपुर के क्षेत्रीय वन संरक्षक डॉ. एनके पांडेय ने बताया कि डॉल्फिन केवल गंगा में ही नहीं मिलती। यह यूपी से लेकर बिहार तक गंगा की सहायगी नदियों में भी पाई जाती है। ऐसे में हमें गंगा के साथ दूसरी नदियों के संरक्षण पर भी काम करना होगा। गंगा पर जो बांध बनाए गए हैं, वे भी डॉल्फिन को खतरा पैदा कर रहे हैं। बांध बनाने से नदी में सिल्ट इकट्ठा होने, धारा के रुकने और अंधाधुंध मछली पकड़ने की कार्रवाइयों ने डॉल्फिन का जीवन संकट में डाल दिया है। उन्होंने बताया कि इको-सिस्टम और खाने के बिना मछली जिंदा कैसे रहेगी? हमें डॉल्फिन के फूड सिस्टम को बचाना होगा। हमें समझना होगा कि डॉल्फिन छोटे-छोटे जलीय जीवों पर ही जिंदा रहती है। उन्होंने बताया कि विक्रमशिला में स्थानीय लोगों और स्कूलों बच्चों को जोड़कर इस संबंध में जागरूकता शुरू की गई। इससे पिछले दो साल में डॉल्फिन मारने का कोई केस नहीं मिला। दुनिया की 80 प्रतिशत डॉल्फिन भारत में पाई जाती हैं।

## Workshop on conserving Gangetic dolphins

**HT Correspondent**  
hvaranasi@hindustantimes.com

**VARANASI:** The first day of workshop on the conservation of the Gangetic dolphins made huge impression on the teachers on Monday.

In the first session of the workshop, technicians imparted training regarding protection of these endangered national aquatic animal.

With the inauguration of the workshop by professor BD Tripathi from forest department and professor Arvind Joshi, informative sessions focusing on the conservation of dolphins started.

In the first half of the workshop, technicians from environment education centre of Lucknow, Mukesh Shukla and Vidya Bhushan Singh gave training to generate awareness among the children regarding conservation of dolphins. The screening of a short documentary movie based on the Gangetic dolphins to create understanding among the trainees followed it in the second half of the first day of workshop.

During the workshop, teachers of 36 schools in the district will be trained to spread awareness among children in their respective schools on the concerned issue. Aiming at spreading awareness among the children, Dolphin Conservation Education Programme (DCEP) has organised a two-day workshop with environment education centre, union ministry of environment and forests, national mission for clean Ganga and the National Ganga River Basin Authority here in the conference hall at department of social science, BHU.

# छात्रों को डाल्फिन की जीवनी से कराया परिचित

रैली को रवाना करते जनप्रतिनिधि।

जागरण

सरायगढ़ (सुपौल), संवाद सत्र : मध्य विद्यालय भगटियाही के प्रांगण में कार्यक्रम गांगेय डाल्फिन (सोस) शिक्षा कार्यक्रम का आयोजन किया गया। कार्यक्रम का उद्घाटन जिला परिषद अध्यक्ष अंजू देवी ने किया। इस दौरान अध्यक्ष ने कहा कि डाल्फिन का हमारे कोसी में पाया जाना प्राकृतिक गौरव व स्रदान की तरह है। सोस कहे जाने वाले इस जीव की रक्षा अत्यंत आवश्यक है। यह नदी की स्वस्थ रखता है। समूचे नदी तंत्र और इसकी जल जीव व्यवस्था को बनाए रखने में डाल्फिन और ऐसे ही अन्य जीव कछुआ, मगरमच्छ का पानी में रहना जरूरी है। उन्होंने कार्यक्रम में उपस्थित छात्र-छात्राओं,

शिक्षकों तथा अभिभावकों से डाल्फिन के सुरक्षा में आगे बढ़ कर आने की अपील की। कार्यक्रम में वैद्यनाथ यादव, ग्राम्यशौच के चन्द्रशेखर, मुखिया सुरेश प्रसाद सिंह, प्रखंड शिक्षा पदाधिकारी, विजय कुमार सिंह, सुशील कुमार मोदी सहित अन्य ने भी अपने-अपने विचारों को रखा। कार्यक्रम के बाद रैली का आयोजन कर कोसी नदी के तट तक ले जाया गया। जहां छात्र-छात्राओं को डाल्फिन के जीवनी से परिचित कराया गया। कार्यक्रम में प्रधान हरिलाल यादव, अखिलेश कुमार, अन्व रजक, उपेन्द्र विकास, उपेन्द्र कुमार, मोहन पाठक, बसंत कुमार सहित कई शिक्षक भी शामिल थे।

## फैजाबाद

### जलीय जीव डाल्फिन का संरक्षण समय का तकाजा : डॉ. मिश्र

#### डाल्फिन संरक्षण पर आयोजित हुई कार्यशाला

(बनारसों संवादक) फैजाबाद 20 सितंबर। गांगेय डाल्फिन संरक्षण कार्यक्रम के अन्तर्गत गंगा संस्थान द्वारा यहां पिछले वर्षों के शिक्षकों हेतु दी दिवसीय कार्यशाला का आयोजन परम्परापरत इन्टर कॉलेज में किया गया जिसमें बड़ी संख्या में शिक्षकों ने प्रतिभागिता की।

उक्त कार्यशाला में जनरल के 43 विद्यालयों में से 55 अध्यापकों ने प्रतिभागिता की। कार्यक्रम में वैद्यनाथ यादव, ग्राम्यशौच के चन्द्रशेखर, मुखिया सुरेश प्रसाद सिंह, प्रखंड शिक्षा पदाधिकारी, विजय कुमार सिंह, सुशील कुमार मोदी सहित अन्य ने भी अपने-अपने विचारों को रखा। कार्यक्रम के बाद रैली का आयोजन कर कोसी नदी के तट तक ले जाया गया। जहां छात्र-छात्राओं को डाल्फिन के जीवनी से परिचित कराया गया। कार्यक्रम में प्रधान हरिलाल यादव, अखिलेश कुमार, अन्व रजक, उपेन्द्र विकास, उपेन्द्र कुमार, मोहन पाठक, बसंत कुमार सहित कई शिक्षक भी शामिल थे।

डाल्फिन के पाने जाने के स्थानों के अन्वय पर 20 ऐसे स्थलों का शपन किया गया है, जहां 35-35 स्तूपों का अन्वय बनवाया जा रहा है। गांगेय डाल्फिन संरक्षण पर आयोजित हुई कार्यशाला में भाग लेने वाले शिक्षकों को बताया कि डाल्फिन का संरक्षण के लिए बहुत आवश्यक है। सोस सतु पर बहुत दुर्लभ व भी बुरा प्रभाव पड़ रहा है। जिससे बच्चों को जानक होने से समाज में परेवर्तन की भूमिका कर इसके संरक्षण के लिए कार्यकर सकते हैं। इस वाता उन्वने बताया कि डाल्फिन में नरियों व उन्वे पाने जाने वाले जीवों की स्थिति काफी खराब है जिससे लेकर पर्यटन एवं वन मन्त्रालय भारत सरकार के वन्य जन्तु संरक्षण अधिनियम के अन्वय में गंगा को राष्ट्रीय नदी घोषित किया गया और गंगा व ब्रह्मपुत्र में पानी जाने वाली संकरवात जगति गांगेय डाल्फिन को 5 अक्टूबर को राष्ट्रीय जलीय जीव घोषित कर संरक्षण नीतियों के अन्वय में गंगा को राष्ट्रीय जलीय जीव घोषित करने की आवश्यकता है।

उत्तर प्रदेश में शुरुवात होकर है। उत्तर प्रदेश में शुरुवात होकर है। उत्तर प्रदेश में शुरुवात होकर है।

एबीआईसी में गांगेय डाल्फिन शिक्षण कार्यशाला में उपस्थित छात्र।

### गांगेय डाल्फिन को निर्मल हों नदियां

इलाहाबाद (ब्यूरो)। राष्ट्रीय स्वच्छ गंगा मिशन के सहयोग से पर्यावरण शिक्षण केंद्र और वसरा की दो दिनों गांगेय डाल्फिन शिक्षण प्रशिक्षण कार्यशाला सोमवार से शुरू हुई। बतौर मुख्य अतिथि रसायन विभाग के पूर्व अध्यक्ष डॉ. अमरनाथ चट्टोपाय ने कहा, गांगेय डाल्फिन के संरक्षण के लिए नदियों को स्वच्छ एवं प्रदूषणमुक्त बनाना होगा।

विश्वीय अतिथि उग्र पर्यटन प्रोसाहन-परिषद की निधि यादव ने याद दिलाया कि गांगेय डाल्फिन को राष्ट्रीय जलीय जीव घोषित किया गया है, ऐसे में इसके संरक्षण के लिए हमें सामूहिक प्रयास करना होगा। वसरा के सचिव डॉ. डॉके शर्मा ने अतिथियों का स्वागत करते हुए गांगेय डाल्फिन के संरक्षण को विद्यालयों की भूमिका

पर्यावरण शिक्षण केंद्र और कटोरा की दो दिनों कार्यशाला शुरू की महत्वपूर्ण बताया। पर्यावरण शिक्षण केंद्र के मुखेश शुक्ल और विद्या सागर सिंह ने इसके संरक्षण के लिए जरूरी जानकारी दी।

बतौर अध्यक्ष कालेज के प्रबंधक महेशचंद्र चट्टोपाय ने कार्यक्रम की सफलता के लिए शुभकामनाएं दीं। एमली बंगाली इंटर कॉलेज में आयोजित कार्यशाला का संचालन जागृति जन कल्याण समिति के राजेश पांडेय ने किया। उदित, सिन्दर खान, शबाना बेगम, प्रसन्न कुमार घोष, सुनील चंद्र जैन, जयदीप गाल्ती, यशवत ने भी गंगा को निर्मल बनाए रखने और डाल्फिन संरक्षण को जरूरत बताई।

# Dolphins represent purity of Ganga

HT Correspondent  
allahabad.tdesk@hindustantimes.com

■ Gangetic dolphin. FILE PHOTO

ALLAHABAD: Like many other dolphin species, the Ganga or freshwater dolphins are also in deep danger of becoming extinct, mainly due to man-made reasons like fishing and river pollution. Former head of chemistry department, Allahabad University Amarnath expressed these views at the "Ganga Dolphin Conservation and Education Workshop" jointly organised by Paryavaran Shikshan Kendra, Lucknow and Vasera organisation, at Anglo Bengali Inter College on Monday. The workshop was held under the aegis of National Clean Ganga Mission.

Dr Amarnath said presence of Ganga dolphins in high number proved that Ganga water was clear as these dolphins could survive only in freshwater. "By making Ganga pollution-free we can stabilise the dwindling population of dolphins and play

an important role in its conservation," he further added. Speaking as a guest of honour, member of UP Tourism Promotion Council Nidhi Yadav said Ganga river dolphin had been declared national aquatic animal of India. "These are

critically endangered species in India. Their population is fast dwindling not only because of increase in river pollution, but also due to increase in hunting activity, presence of heavy silt in water, and construction of barrage," she added. Secretary Vasera, DK Sharma said the dolphins could be saved only with the combined efforts of government and general public. While the laws for poaching of endangered aquatic animals should be strengthened and implemented properly, people should also make efforts to check pollution in Ganga. Manager Anglo Bengal Inter College Mahesh Chandra Chattopadhyay presided over the programme.

# बच्चा का दा डाल्फिन सरक्षण का जानकारी

**बेगूसराय।** गंगेय डाल्फिन के अस्तित्व पर मंडराने वाले खतरे को देखते हुए इसके संरक्षण के लिए स्कूली बच्चों ने रविवार को साइकिल यात्रा कर लोगों में जागरूकता फैलाई।

मध्य विद्यालय दुमरी के नवजीवन डाल्फिन क्लब के छात्र-छात्राओं ने शिक्षक अनुपमा सिंह के साथ गंगेय डाल्फिन संरक्षण जागरूकता के लिए साइकिल यात्रा निकाली। साइकिल यात्रा में 40 बच्चे शामिल हुए। तीन घंटे तक गंगा के किनारे सॉस को देखने के लिए बच्चे रुके रहे।

शिक्षिका अनुपमा सिंह ने बताया कि इस दौरान मात्र दो से तीन बार ही सॉस को देखा गया। इससे साबित होता है कि सॉस की संख्या में कमी हो रही है। ग्रामीणों ने बताया कि गंगा में पहले से सॉस की संख्या काफी कम हो गई है। बच्चों ने ग्रामीणों से सॉस को बचाए रखने का अनुरोध किया। अनुपमा सिंह ने बताया कि मछली पकड़ने के दौरान जाल में सॉस

रविवार को रामदीरी में गंगा नदी के किनारे डॉल्फिन देखने पहुंचे दुमरी मध्य विद्यालय के बच्चे। • हिन्दुस्तान

भी फंस जाते हैं। सॉस को पकड़कर मछुआरे उससे तेल निकालते हैं। फिर उस तेल की मदद से आसानी से मछली का शिकार करते हैं।

सॉस के संरक्षण से गंगा की भी सुरक्षा होगी। रेली में रीतेश, सोनू, अभिषेक, दानिश आसिफ, सचिन, रविराज, राहुल, शमशाद, सुप्रिया, लवली,

कविता, खुशी, काजल, रौशनी, रोजी, नुजहत, नाजनी, शिम्मी, स्लमा, लाडली, गुलशन, रौशनी आदि बच्चे शामिल हुए।

**डॉल्फिन को बचाने के लिए गंगा को रखें स्वच्छ**

विज्ञान दिवस पर डॉल्फिन मेले का आयोजन

**बेगूसराय(नगर).** एसएफएसइडी के 11वें स्थापना दिवस सह विज्ञान दिवस के अवसर पर मध्य विद्यालय दुमरी के परिसर में डॉल्फिन मेले का आयोजन किया गया, जिसमें 10 सरकारी विद्यालय के 150 बच्चों ने विज्ञान, भाषण एवं चित्र प्रदर्शनी में हिस्सा लिया। प्रतियोगिता में प्रथम द्वितीय एवं तृतीय स्थान पाने वाले स्वहित सभी प्रतिभागियों को संस्था द्वारा प्रमाणपत्र दिया गया। मुख्य अतिथि निहाल स्वर्धसेवी महासच के अध्यक्ष दिनेश सिन्हा ने संस्था द्वारा किये जा रहे कार्यों की सराहना करते हुए कहा कि गंगा हम सबकी माँ है, इसकी महत्ता हमेशा रही है और हमेशा रहेगी। हम

कार्यों का रिपोर्ट प्रस्तुत किया, वहीं संस्था के संस्थापक अध्यक्ष डॉ विद्यापति राय के निधन पर शोक व्यक्त करते हुए कहा कि उनकी कभी भुलाया नहीं जा सकता है। संस्थान कार्यक्रम संयोजक अनुपमा सिंह ने की इस मौके पर शिक्षक सुरेंद्र साहू, विद्यान प्रियंजन, किनोद कुमार, गौरीशर, अरविंद कुमार, संजय कुमार यादव, ममता कुमारी, वैदेही कुमारी सहित अन्य शिक्षक-निर्देशिकाएं उपस्थित थे। विज्ञान में प्रथम, द्वितीय एवं तृतीय क्रमशः मध्य विद्यालय दुमरी, मध्य विद्यालय इटका, धाषण में क्रमशः विद्यालय कुमार, अंशु कुमारी व राहुल कुमार तथा चित्र प्रदर्शनी में मध्य विद्यालय परसपुरा, मध्य विद्यालय रतनपुर व मध्य विद्यालय दुमरी ने स्थान प्राप्त किया।

प्रमाणपत्र के साथ प्रतिभागियों

सब्स की जिम्मेदारी है कि गंगा स्वच्छ बनाए, ताकि डॉल्फिन बच पाये, सरका मंत्र के शिक्षक नेता रंजन कुमार ने कहा कि बच्चों द्वारा किया गया धाषण वास्तव में डॉल्फिन संरक्षण के लिए संदेश है, अभ्युत्थान कर रहे संस्था के सचिव निरंजन कुमार सिन्हा ने स्वागत धाषण के साथ संस्था द्वारा किये गये 11 वर्षों के

# डॉल्फिन संरक्षण को निकाली जागरूकता रैली

## पर्यावरण संरक्षण

◆ संकटग्रस्त राष्ट्रीय जलीय जीव डॉल्फिन के संरक्षण पर जोर

संसू महसी (बहसइच) : गांगेय डॉल्फिन संरक्षण शिक्षण कार्यक्रम के तहत पर्यावरण शिक्षण केंद्र बौण्डी के तत्वावधान में साईगांव में जागरूकता रैली का आयोजन किया गया। पूर्व माध्यमिक व प्राथमिक विद्यालय के बच्चों ने रैली के माध्यम से नदियों को प्रदूषण मुक्त करने व राष्ट्रीय जलीय जीव डॉल्फिन के संरक्षण पर जोर दिया।

पर्यावरण शिक्षण केन्द्र के सदस्यों के साथ पूर्व माध्यमिक व प्राथमिक विद्यालय के बच्चों ने 'हमने यह ठाना है, डॉल्फिन को बचाना है' सहित अन्य नारे लिखी तख्तियों को हाथों में लेकर भ्रमण किया। पर्यावरण शिक्षण केन्द्र के प्रोजेक्ट एसोसिएट विपिन व सुबोध ने ग्रामीणों से अपील की कि राष्ट्रीय जलीय जीव को बचाने के लिए हमें मिलकर प्रयास करने की जरूरत है। खासकर नदी के तटवर्ती गांवों के लोग जागरूक होकर इस अभियान में अपनी अहम भूमिका अदा कर सकते हैं। उन्होंने अभिभावकों को देश में चल रहे पर्यावरण संरक्षण के प्रयासों की

गांगेय डॉल्फिन संरक्षण शिक्षा कार्यक्रम की रैली निकालते विद्यार्थी

जागरण

विस्तृत जानकारी दी। गांगेय डॉल्फिन की उपस्थिति नदी की स्वच्छता व निर्मलता को दर्शाती है। डॉल्फिन हमेशा स्वच्छ जल में रहती है। इसलिए डॉल्फिन के संरक्षण के लिए नदियों को प्रदूषण मुक्त बनाना होगा। प्रोजेक्ट एसोसिएट ने बताया कि गांगेय

डॉल्फिन संकट के दौर से गुजर रही है। उन्होंने बताया कि पूरे भारत में इनकी संख्या कुल 1200 से 2000 के बीच है। शिक्षकों व ग्रामीणों ने पर्यावरण संरक्षण का संकल्प दोहराया। इस मौके पर प्रधानाध्यापक साकेत तिवारी सहित अन्य शिक्षक मौजूद रहे।

## लखनऊ अमर उजाला

शनिवार | 25 अप्रैल 2015

## बच्चों के जरिये डॉल्फिन को बचाने की जुगत

अमर उजाला ब्यूरो

लखनऊ। गंगा में बढ़ रहा प्रदूषण नदी में मौजूद डॉल्फिन के लिए खतरा बन रहा है। इसके अलावा नदी से निकाली जा रही नहरें और बांध दूसरे सबसे बड़े कारण डॉल्फिन की मौत के लिए बनकर सामने आए हैं।

शुक्रवार को साईस सिटी, अलीगंज में आयोजित सेंटर फॉर एन्वायरमेंटल एजुकेशन (सीईई) की राज्यस्तरीय कार्यशाला में डॉल्फिन की मौत का मुद्दा उठा। यूपी राज्य जैवविविधता बोर्ड की सचिव प्रतिभा सिंह ने कहा कि गंगा में प्रदूषण का स्तर बढ़ने से ही केवल डॉल्फिन को खतरा नहीं है। नदी से निकल रही नहरों से भी खतरा पैदा हुआ है। सीईई की कॉर्डिनेटर प्रीति कनौजिया ने बताया कि डॉल्फिन को किसी मकसद के साथ मारने की घटनाएं भी सामने आई

साईस सिटी में कार्यशाला, गंगा में प्रदूषण को बताया खतरा

हैं। इनमें उनकी खाल में मिलने वाली चर्बी के लिए डॉल्फिन मारने की घटनाएं भी हो रही हैं। कार्यशाला में इसके अलावा बच्चों को समुदाय में बनी भांति को भी दूर करने के लिए जानकारी दी गई। बच्चों को बताया गया कि डॉल्फिन किसी भी तरह से मानव के लिए खतरा नहीं है। बच्चे ही बेहतर तरीके से इस सूचना को बड़ों तक पहुंचा सकते हैं।

बच्चे किए गए पुरस्कृत

डॉल्फिन संरक्षण के लिए चल रहे कार्यक्रम में प्रतिभागिता में विजयी बच्चों को प्रतिभा सिंह ने पुरस्कृत भी किया। बच्चों ने स्कूलों में चल रही डॉल्फिन न गतिविधियों की एक प्रदर्शनी भी लगाई। पुरस्कार वितरण के बीच प्रतिभा सिंह के साथ उपनिदेशक पर्यावरण मंत्रालय डॉ. अमित गुप्ता, साईस सिटी के कॉर्डिनेटर उमेश कुमार भी मौजूद रहे।

सीईई भी इस काम के लिए क्लब बनाकर यूपी और बिहार के 700 स्कूलों में काम कर भी रहा है। कार्यशाला में बताया गया कि डॉल्फिन जैव विविधता के लिए बहुत जरूरी है। इसे राष्ट्रीय जलीय जीव भी घोषित किया गया है। यह घोषणा 5 अक्टूबर 2009 को हुई। इस दिन को हर साल डॉल्फिन डे के रूप में भी मनाया जाता है।

# CEE spreads awareness about Gangetic dolphins

Dainik Hindustan, 20 September 2015, Gopalganj

**New Delhi, 27 August:** In a bid save Gangetic dolphins, the Centre for Environment Education (CEE) today held its first awareness programme in the 'non-dolphin' state, educating students of Delhi about effects of pollution in river Ganga.

Gangetic Dolphin is an endangered species, declared National Aquatic animal in 2009.

"River dolphins in India are found in Ganga and Brahmaputra. Due alarming level of pollution in Ganga, the survival of dolphins has jeopardized and their population is going down. These programs were active in the states where dolphins are found however for the first time such an initiative has been taken here to educate the students in Delhi," said Prarthana Borah. Around 300 students from Delhi schools participated in the programme. CEE is also planning to take the students out for camping around the areas of Gangetic dolphins. The event was held in collaboration with National Mission for Clean Ganga (NMCNG) at National Bal Bhawan. CEE has initiated 'Ganges River Dolphins Conservation Education Programme' in Ganga basin, which covers 20 locations in Uttar Pradesh and Bihar. The programme focuses on working with schools and communities living along Ganga basin. "We also invited students from Dolphin cluster Schools from Bihar and UP. The students interacted and exchanged ideas. It was a new concept for the Delhi students and mission was to make the future generation aware about other hazards of pollution in Ganga," said Prarthana Borah.

## गांगेय डॉल्फिन संरक्षण पर दो दिवसीय प्रशिक्षण

गोपालगंज | हिटी

शहर के एमएम मेमोरियल उर्दू उच्चतर माध्यमिक विद्यालय में गांगेय डॉल्फिन शिक्षा कार्यक्रम के तहत दो दिवसीय शिक्षक प्रशिक्षण कार्यशाला का आयोजन किया। प्रशिक्षण में गंगा व उसके सहायक नदियों में पाये जाने वाले जीव गांगेय डॉल्फिन (सोंस) के संरक्षण के प्रति जागरूकता फैलाने के लिए शिक्षकों को प्रशिक्षित किया गया। कार्यक्रम का आयोजन जल संसाधन विभाग, नदी

विकास और गंगा संरक्षण मंत्रालय भारत सरकार एवं राष्ट्रीय स्वच्छ गंगा मिशन की ओर की गई थी।

मुख्य अतिथि कार्यक्रम पदाधिकारी कपिलदेव तिवारी, मनोज कुमार, प्राचार्य मो.नेयाल अहमद, प्रशिक्षक मो.साकिब खान, शिक्षक मो. जमालुद्दीन, आशुतोष मिश्र, पिटू कुमार चौरसिया, सुनील कुमार, कुमार विवेक सिंह, गीता कुमारी, अनामिका प्रियदर्शनी आदि थे। कार्यक्रम का संचालन राजेश कुमार और धन्यवाद ज्ञापन तारकेश्वर कुमार ने किया।

## गहरे संकट में है गंगा की डॉल्फिन

पटना | हिन्दुस्तान प्रतिनिधि

गंगा नदी की निर्मलता की पहचान डॉल्फिन की संख्या लगातार कम होती जा रही है। यदि समय रहते इस अद्भुत जीव को संरक्षित नहीं किया गया तो नदियों के साथ-साथ मानव जीवन के अस्तित्व पर भी संकट आ जाएगा। क्योंकि नदियां जीवन का आधार हैं और डॉल्फिन नदियों के स्वास्थ्य का परिचायक हैं।

### प्रशिक्षित हुए शिक्षक

गंगा में डॉल्फिन की संख्या मात्र 1200 से 1800 सौ के बीच बची हुई है। यह बातें सीईई के परियोजना अधिकारी विद्याभूषण सिंह ने पर्यावरण शिक्षण केंद्र की ओर से राजकीय बालिका उच्च माध्यमिक विद्यालय में गांगेय डॉल्फिन संरक्षण विषय पर दो दिवसीय आयोजित सेमिनार के समापन पर कही। डॉल्फिन विशेषज्ञों ने नदी के आसपास 3 से 5 किमी. की दूरी पर स्थित 40 स्कूलों के

### संरक्षण

- गंगा नदी के पास स्थित 40 स्कूलों के शिक्षकों को डॉल्फिन संरक्षण पर दिया गया प्रशिक्षण
- ये शिक्षक स्कूली बच्चों के बीच डॉल्फिन संरक्षण के प्रति जागरूकता फैलाएंगे

शिक्षकों को प्रशिक्षण दिया गया ताकि वे बच्चों को डॉल्फिन संरक्षण कार्यक्रम के माध्यम से जागरूक कर सकें। डॉल्फिन विशेषज्ञ प्रो. आर.के. सिन्हा ने गांगेय डॉल्फिन के स्तनधारी गुणों, प्रजनन, व्यवहार और नदी में मछली को विभिन्न प्रजातियों की जानकारी शिक्षकों को दी। उन्होंने कहा कि डॉल्फिन को राष्ट्रीय जलीय जीव घोषित करने में बिहार की महत्वपूर्ण भूमिका रही है। डॉ. गोपाल शर्मा ने डॉल्फिन की घटती संख्या पर

चिंता व्यक्त की। कहा कि यदि हमलोग चाहें तो नदियों की निर्मलता को प्रतीक गांगेय डॉल्फिन को मिलजुलकर संरक्षित कर सकते हैं। शिक्षा विभाग के जिला कार्यक्रम पदाधिकारी अशोक कुमार ने कहा कि गंगा का हमारे जीवन में महत्वपूर्ण स्थान है। गंगा की गाय कही जाने वाले जीव डॉल्फिन का संरक्षण हम सबका दायित्व है। इस मौके पर सीईई के परियोजना अधिकारी मो.साकिब खान, विजया कुमारी, अनिल उपस्थित थे।

## धूमधाम से मना गांगेय डाल्फिन दिवस

गोंडडा, 6 अक्टूबर (निज संवाददाता) प्राथमिक विद्यालय धौरहरा कर्नलगंज गोंडडा में गांगेय डाल्फिन दिवस बड़े ही धूमधाम से मनाया गया। गांगेय डाल्फिन दिवस प्रतिवर्ष 5 अक्टूबर को मनाया जाता है। यह एक जलीय जीव है। जोकि वन्य जीव अधिनियम 1972 की सूची में दर्ज है। भारत सरकार द्वारा 5 अक्टूबर 2009 को भारत का राष्ट्रीय जलीय जीव घोषित किया गया।

गांगेय डाल्फिन का नदी में खाद्य शृंखला में सर्वोच्च स्थान है। यह नदी में संतुलन बनाये रखती है। यह संकटग्रस्त प्रजाति है। इनका पर्यावास नदी है। हमें चाहिए कि हम इनके पर्यावास को संरक्षण दें। इसी क्रम में आज प्राथमिक विद्यालय धौरहरा कर्नलगंज गोंडडा में एक बृहद कार्यक्रम आयोजित किया गया। जिसमें सभी बच्चों को गांगेय डाल्फिन का बैज दिया गया। बच्चों ने डाल्फिन का चित्र बनाये। बच्चों व ग्रामीणों को इसके बारे में विस्तार से प्रभारी प्रधानाध्यापक रवि प्रताप सिंह ने बताया। डाल्फिन स्वच्छ नदी की सूचक होती है। कार्यक्रम में

बच्चों को डाल्फिन, घड़ियाल, मछली, मेंढक, नदी, कछुआ आदि की कविता सुनाई गई। इस दौरान एक सामान्य ज्ञान प्रतियोगिता का आयोजन किया गया व जीतने वाले बच्चों को पुरस्कृत किया गया। कार्यक्रम के अंतर्गत बच्चों ने जागरूकता हेतु एक रैली निकाली। रैली के दौरान बच्चों के हाथों में तख्तियां थीं। इसमें सेव रिवर सेव डाल्फिन, सेव डाल्फिन सेव नैचर लिखा था। बच्चों ने ग्रामीणों को हैण्ड बिल भी बांटी। रैली पंडित पुरवा, पचासा, अहिरन पुरवा, कटरा होते हुए पुनः विद्यालय में समाप्त हुई। प्रशिक्षु शिक्षक सुबाष चन्द्र ने कहा अब समय आ गया है जब हम अपने नदियों को व डाल्फिन को बचाएं। यह कार्यक्रम डाल्फिन संरक्षण कार्यक्रम के अंतर्गत कराया गया।

इस कार्यक्रम को पर्यावरण शिक्षण केंद्र लखनऊ के परियोजना अधिकारी विद्या भूषण सिंह व टी एस ए के अधिकारी भास्कर दीक्षित के दिशा निर्देशों के क्रम में कराया गया। इस दौरान रवि प्रताप सिंह, प्रेम प्रकाश सोनकर, सुबाष चन्द, मुन्नी, रमकला, भीम, निशा, सोनू आदि उपस्थित रहे।

## पर्यावरण संरक्षण को वनों एवं नदियों को बचाना जरूरी

जासं, बेतिया : बैरिया प्रखंड के उदयपुर वन्य प्राणी आश्रयणी में सोमवार को वन्य प्राणी सप्ताह के अंतर्गत वन प्रमंडल बेतिया एवं पर्यावरण शिक्षण केंद्र लखनऊ के संयुक्त तत्वाधान में वन्य प्राणी सप्ताह सह गांगेय डाल्फिन दिवस का आयोजन किया गया। कार्यक्रम का संचालन तरुमित्र के सदरे आलम ने किया। इस अवसर पर नदी एवं वनों में पाए जाने वाले वन्य/जलीय जीव तथा वन्य जीवों के अधिवास के संरक्षण विषयक पर पेंटिंग प्रतियोगिता तथा वनों की सुरक्षा के लिए वन्य प्राणी के संरक्षण एवं नदियों की सुरक्षा के लिए जलीय जीवों की सुरक्षा विषय पर निबंध एवं स्लोगन प्रतियोगिता आयोजित की गई। इस अवसर पर वन प्रमंडल पदाधिकारी श्री हेमकांत राय ने संबोधित करते हुए कहा कि पर्यावरण को संरक्षित रखने के लिए वनों एवं नदियों को बचाना जरूरी है। यह तभी संभव है जब वन्य जीवों एवं जलीय जीवों का संरक्षण सुनिश्चित किया जाए। इस कार्य के लिए जन जागरूकता तथा जन सहभागिता आवश्यक है। पर्यावरण शिक्षण केंद्र के परियोजक पदाधिकारी मोहम्मद शाकिब खां ने कहा कि मानक को अपने आसपास पाए जाने वाले जलीय तथा

### वन्य प्राणी सप्ताह सह गांगेय डाल्फिन दिवस का आयोजन

वन्य जीवों का संरक्षण करना चाहिए। जिससे परितंत्र संतुलित रहेगा। इस कार्यक्रम में शहर एवं ग्रामीण क्षेत्र के कुल 22 विद्यालय के 130 विद्यार्थियों ने भाग लिया। वहीं, केदार पांडेय प्लस टू कन्या विद्यालयों की छात्राएं साइकिल रैली को लेकर उदयपुर पहुंची। रास्ते में नारों के माध्यम से छात्राओं ने डाल्फिन एवं नदी संरक्षण के लिए लोगों को जागरूक किया। संयुक्त सचिव संजय कुमार ने छात्र-छात्राओं के वन्य जीवों तथा जलीय जीवों संरक्षण के लिए शोध एवं अध्ययन करने के लिए प्रेरित किया। कार्यक्रम को संबोधित करने वालों में शिक्षक मनोज कुमार, रविकांत झा, राजू सिंह, अमरेंद्र सिंह, मीनू वर्मा, अखिलेश्वर कुमार, देवजीत, आशुतोष रंजन, दुलारे, मोहम्मद नुरैन, सुजीत कुमार, साहिस्ता प्रवीन, सिस्टर अमृता एफ आदि लोगों ने संबोधित किया। स्लोगन प्रतियोगिता में प्रथम सुरभि कुमारी, द्वितीय ममता कुमारी, तृतीय नवीन कुमार, चतुर्थ पुनम कुमारी, पंचम वरूण श्राफ को पुरस्कार दिया गया।

### कैसे बचे डाल्फिन, मंथन को जुटे 35 विद्यालयों के शिक्षक

वाराणसी, १७ दिसम्बर। बीएचयू में बुधवार को हुए ओरिएंटेशन रिप्रेजर मीट में शहर के 35 स्कूल के शिक्षक जुटे और इस बात पर मंथन किया गया कि राष्ट्रीय जलीय जीव डाल्फिन को गंगा में कैसे बचाया जाय। इसका आयोजन विकास एवं शिक्षण समिति, पर्यावरण एवं धारणीय विकास संस्थान, बीएचयू और सीईई के संयुक्त तत्वाधान में किया गया। मीट में पर्यावरणीय विशेषज्ञों का कहना था कि जलीय पर्यावरण क्षीयकर गंगा के लिये डाल्फिन का संरक्षण बहुत जरूरी है। इस दौरान इसके संरक्षण में छात्रों की भूमिका पर भी चर्चा की गई।

कविता शाह ने डाल्फिन संरक्षण व जागरूकता के महत्व को रेखांकित करते हुए जीव विविधता के संदर्भ में बच्चों में अभी से जागरूकता पैदा करने को आवश्यक बताया। कहा कि इसके दूरगामी परिणाम अवश्य सामने आएंगे। पर्यावरण शिक्षण केंद्र लखनऊ के विद्वदा भूषण सिंह व गांगेय डाल्फिन संरक्षण शिक्षण कार्यक्रम के परियोजना निदेशक डॉ. राजेश कुमार श्रीवास्तव ने डाल्फिन संरक्षण व जागरूकता की विशियों और खतरों के बारे में विस्तार से बताया। आयोजन सचिव व पर्यावरणविद् प्रो. जीपी सिंह ने इसे सम्पूर्ण समाज के लिये दीर्घकालीन निवेश बताया। डॉ.

राजेश कुमार ने डाल्फिन गणना के लिये यूपी सरकार के गणना विभाग के साथ जलमार्ग से 225 किमी यात्रा का वृत्तान्त सुनाया। कहा कि गंगा में मानवजनित तमाम बाधाएं उत्पन्न की जा रही हैं। इससे गंगा की शुद्धता प्रभावित हो रही है। गंगा के किनारे रासायनिक खाद का प्रयोग, नालों का प्रवाह मछलियों के पिकार के लिये लगाई गई जाल डाल्फिन के लिये खतरनाक साबित हो रही है, जिससे जीव विविधता बुरी तरह से प्रभावित हो रही है। इसके पूर्व अतिथियों का स्वागत पर्यावरण प्रो. जीपी सिंह और संचालन व धन्यवाद डॉ. राजेश व सोमा शर्मा ने किया।

## ● बैठक को संबोधित करते अतिथि, उपस्थित शिक्षक

जागरण संवाददाता, सुपौल राष्ट्रीय स्वच्छ गंगा मिशन, राष्ट्रीय गंगा नदी बेसिन प्राधिकरण, भारत सरकार द्वारा प्रायोजित पर्यावरण शिक्षण केंद्र, लखनऊ एवं ग्रामपंचायत के संयुक्त प्रयास से गंगेय डॉल्फिन संरक्षण शिक्षा कार्यक्रम तहत मध्य विद्यालय, पाण्डित्यादी में एक दिवसीय शिक्षक अनुभवीकरण सह समीक्षा बैठक का आयोजन सर्वे धर्म प्रार्थना से आरंभ हुआ। अध्यक्षता वसुदेव सर्वोदय सेवक अवध नारायण यादव ने की।

कार्यक्रम के शीर्षक वस्तु पर प्रकाश डालते हुए ग्रामपंचायत के चन्द्रशेखर ने बताया कि वास्तव में हम प्रकृति को संतान है। मानव की तरह ही सभी स्वस्थ और जलीय जीवों को प्रकृति में वापस करने का प्राकृतिक अधिकार है। सभी जीवों में मनुष्य श्रेष्ठ है अपने श्रेष्ठता को बिनिक और नैतिकता की ओर न जाकर उन्होंने अपनी भ्रष्टाचार्य लोकार के कारण सभी जीवों से बेधकर उनके अस्तित्व को ही समाप्त करने में लग गया। विज्ञान और विकास की दृष्टिगत

हमें इन्होंने प्रकृति के सभी आधारभूत तत्व मिट्टी, खल, वायु, अन्न और आकाश को क्षति पहुंचा रहा। आज नैतिकतात्मक वैज्ञानिक यह निष्कर्ष कर चुके हैं कि मूक जीवों जो मनुष्य द्वारा की जा रहे हिसा का मूल कारण ही प्रकृति पर बंद रही प्राकृतिक आपदा और प्रदूषण है। उन्होंने कहा कि कारसे जिन्हें हम हवायी चर्च से मानव प्रेम अदा रखते आ रहे हैं उस नदी और उसके जीवों का अस्तित्व खतरे में है। गंगेय डॉल्फिन न केवल अदम्य मिर और पाई की रक्षा हम नहीं कर पा रहे हैं। उन्होंने कहा कि जोरों के सभी जलीय जीवों के साथ डॉल्फिन की रक्षा करना समाज का महत्वपूर्ण कर्तव्य है।

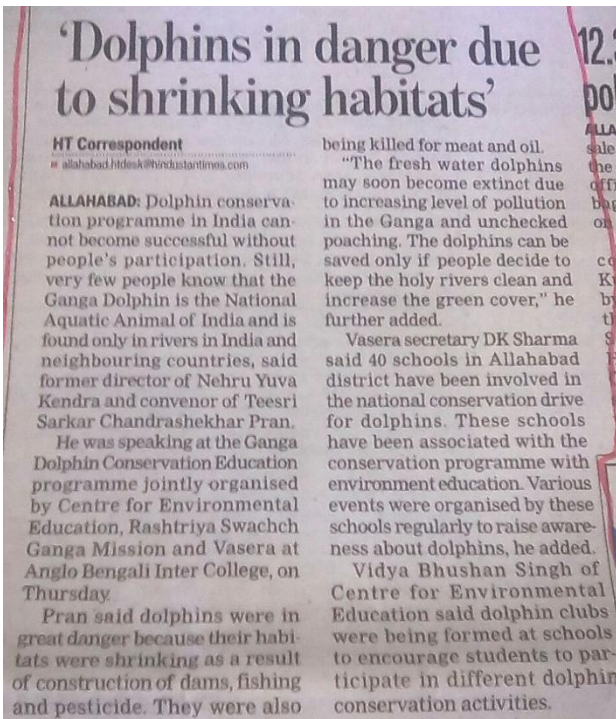

स्वयं केन्द्र के आचार्य शिवक ने कहा कि बाप या डॉल्फिन को बचाने हम उनपर उनकार नहीं कर रहे हैं। परते तो हम उनके

जीवन और आवास को उगाड़ते हैं और फिर केवल खुद को संशोध देने के लिए ऐसे कार्यक्रम करते रहते हैं। हमारा पूरा परिवारिक और सामाजिक धातावरण विनाशमय हो चुका है, जब तक यह प्रकृति नहीं बदलती तब तक जीव संरक्षण और पर्यावरण रक्षण का कार्य संभव नहीं। उन्होंने कहा कि हमने एक मानव-केन्द्रित सोच के आधार पर प्रकृति और इसके अन्य जीवों को केवल अधिकांशतः उपयोग की चीज समझ ली है।

आज जब यदी चीज हम पर भारी पड़ रही है तो हम खुद को असहाय पा रहे हैं। सिद्धांत रूप में विज्ञान यानता तो है कि प्रकृति में सभी प्राणियों के परस्पर जीवन-चक्र में संतुलन जरूरी है, लेकिन आधुनिक रूप में हम इसे अग्रगण्य में विफल रहे हैं क्योंकि यह विज्ञान हमारे जीवन में बाधा और स्तुति के स्तर पर उतरा ही नहीं है। डॉल्फिन आज विज्ञान की सुधमता को आधुनिक प्रकृति पर कसने की

आवश्यकता है। पर्यावरण शिक्षण केंद्र, लखनऊ के प्रो. साकिब ने सुपौल जिले में गंगेय डॉल्फिन न संरक्षण शिक्षा कार्यक्रम की आवश्यकता पर प्रकाश डालते हुए विगत एक वर्ष से चल रहे कार्यक्रम की समीक्षा की। उन्होंने जिले में चल रहे गंगेय डॉल्फिन संरक्षण शिक्षा कार्यक्रम पर शिक्षकों से विस्तार पूर्वक चर्चा करते हुए इस कार्यक्रम से बच्चों को जोड़ने, गतिविधि आधारित प्रयास करने, खेल, परिचयम प्राप्त बच्चों को विद्यालय और ग्रामपंचायत पर पर्यावरण एवं जल नदियों के संरक्षण को कार्ययोजना को रेखांकित किया।

कार्ययोजना प्रक्रिया में शिक्षिका सरिता श्रुति कुमारी, होय देवी और शिक्षकों में रमेश प्रसाद मेहता, आशुतोष कुमार झा, विनोद कुमार झा, संजय कुमार जाकूर, जे. जाकिर हुसैन, पवन कुमार मेहता, अर्जुन कुमार पांडे, दामोदर प्रसाद आदि ने भाग लिया। अंत में गंगेय डॉल्फिन न और जल जीवों की रक्षा का संकल्प के साथ कार्यक्रम का समापन हुआ।

# जैविक खेती और उन्नत पशुपालन की दी जानकारी

बहराइच | कार्यालय संवाददाता

बौण्डी के सरस्वती शिशु मन्दिर में कृषि विज्ञान केन्द्र व गंगेय डाल्फिन संरक्षण शिक्षण कार्यक्रम के तहत पर्यावरण केन्द्र लखनऊ की ओर से संयुक्त रूप से प्रशिक्षण शिविर का आयोजन किया गया। जिसमें कृषि वैज्ञानिकों ने किसानों को जैविक खेती व उन्नत पशुपालन की जानकारी दी।

गोष्ठी की अध्यक्षता कर रहे वैज्ञानिक डॉ.वीपी सिंह ने कहा कि अधिकांश किसान रासायनिक खाद से खेती कर रहे हैं जिससे परम्परागत जैविक खाद का लोप होता जा रहा है। इसका प्रयोग करने से भूमि की उर्वरशक्ति भी नष्ट हो रही है और पर्यावरण प्रदूषण बढ़ रहा है। रासायनिक खाद के प्रयोग से पैदा हुआ अनाज खाने से मनुष्य में तरह-तरह की बीमारियां हो रही हैं। इसका जीव-जन्तुओं पर भी विपरीत असर पड़ रहा है। वैज्ञानिक शेर सिंह ने कहा कि जैविक खेती अपनाते के लिए किसानों को जैविक खाद व

## शिविर

- पर्यावरण शिक्षण केन्द्र व कृषि विज्ञान केन्द्र में बौण्डी में लगाया प्रशिक्षण शिविर
- भूमि की उर्वरा शक्ति के लिए घातक है रासायनिक खाद

जैविक बीज की आवश्यकता होती है। इसके लिए देशी जानवर को पालने की जरूरत है। गाय के गोबर से बर्मी कम्पोस्ट खाद तैयार कर रासायनिक खाद की आवश्यकता पूरी की जा सकती है। गो मूत्र से बीज शोधित कर उगाने से उसके गैर जरूरी तत्व नष्ट हो जाते हैं। परियोजना अधिकारी विद्याभूषण सिंह ने कहा कि डाल्फिन के विलुप्त होने का कारण पर्यावरण का क्षरण व नदी में मछलियों का शिकार करना है। मछली पकड़ने वाले प्लास्टिक व नायलॉन के जाल में फंसाकर डाल्फिन को नष्ट किया जा रहा है। किसानों को नदी के किनारे जैविक खाद आधारित खेती करना चाहिए।

## बचाने के तरीकों को जीवन में करें लागू तभी होगी डाल्टिन संरक्षण: भावना शिदार्थी

इलाहाबाद। विश्व को पांच संकटग्रस्त प्रजातियों में डाल्टिन एक है। जिसे बचाने के लिए जागरूकता अभियान बच्चों के साथ समुदाय में भी चलाना चाहिए। बचाने के तरीकों को जीवन में लागू करने से जब आदत बन जायेगी तब किसी जागरूकता अभियान की आवश्यकता नहीं होगी। यह विचार भावना शिक्षार्थी, उप शिक्षा निदेशक, उत्तर प्रदेश माध्यमिक शिक्षा परिषद, इलाहाबाद में डाल्टिन रिसेंस सेंटर, एंग्लो बंगाली इण्टर कालेज द्वारा वसंरा तथा सेंटर फार इनवायरमेंटल एजुकेशन, स्वच्छ गंगा मिशन के संयुक्त तात्वाधान में कालेज परिसर में आयोजित समीक्षा बैठक/कार्यशाला में बतौर मुख्य अतिथि व्यक्त किया। उन्होंने बताया कि गांगेय डाल्टिन, स्तनधारी

प्रजातियों की है। इस अवसर पर उन्होंने वसंरा द्वारा पर्यावरण के क्षेत्र में विशिष्ट

# जैविक खेती को अपना रहे किसान

संसू. बौड़ी(बहराइच) : पर्यावरण शिक्षण केंद्र के सहयोग से महसी तहसील के पांच ग्राम पंचायतों के किसानों ने यह साबित कर दिया है कि खेती घाटे का सौदा नहीं है। राष्ट्रीय स्वच्छ गंगा मिशन द्वारा चलाई जा रही गांगेय डॉल्लिफन संरक्षण शिक्षण संस्थान द्वारा किया गए प्रयास से किसानों ने रासायनिक खेती शुरू की। जैविक खेती शुरू करने वाले बौड़ी के दिनेश तिवारी, अंटीडर के भगीरथी गौतम, सिलौटा के दीनानाथ वर्मा, पहिया के विवेक तिवारी, कायमपुर के रामानुज प्रजापति बताते हैं कि रासायनिक खेती काफी महंगी पड़ रही थी। ऐसे में प्राकृतिक आपदा आने पर काफी नुकसान सहन करना पड़ता था। जैविक खेती से कम लागत में बेहतर उपज व पैसों की बचत हो रही है। वर्ष 2014 में बौड़ी में संचालित पर्यावरण शिक्षण केंद्र ने क्षेत्र के अंटीडर, सिलौटा, बौड़ी, गोलागंज व कायमपुर गांवों को चिह्नित किया। इन गांवों में लगातार चौपाल लगाई गईं। जागरूकता शिविर आयोजित किए गए। कृषि वैज्ञानिकों ने किसानों को जैविक खेती करने के गुर बताए। परिणाम सार्थक दिखा। यहां के लोग जैविक खेती की ओर रुख करने लगे।

## जैविक खेती से समृद्धि हो रहे किसान

पर्यावरण शिक्षण केंद्र बौड़ी के प्रभारी विपिन वर्मा ने बताया कि पांच गांवों में हरी खाद व वर्मी कंपोस्ट संस्थान के सहयोग से बनवाई जा रही है। समय-समय पर कृषि विज्ञान केंद्र के सहयोग से इन किसानों को बीज अन्य संसाधन मुहैया कराए जाते हैं। इन किसानों को

रासायनिक उर्वरक की जगह पर जैविक खाद के प्रयोग के गुर बताए जा रहे हैं। किसानों को देशी बीजों को गोबर व गोमूत्र से संशोधित करने का प्रशिक्षण भी दिया जा चुका है।

## कैसे बढ़ा जैविक खेती का दायरा

परियोजना के सहायक अधिकारी ने बताया कि क्षेत्र के किसानों को कीटनाशक के रूप में धतूरे के बीजों, नीम, कटहल, व मदार की पत्तियों के प्रयोग का ज्ञान दिया गया। सड़े गले खरपतवार से जैविक व वर्मी कंपोस्ट खाद बनाने की जानकारी दी गई। पौधरोपण के लिए उन्हें जागरूक किया गया। डॉल्लिफन की नदी संरचना में महत्वपूर्ण भूमिका का ज्ञान दिया गया। रासायनिक उर्वरकों के दुष्परिणामों से उन्हें अवगत कराया गया। फलस्वरूप क्षेत्र के सैकड़ों किसान रासायनिक खेती छोड़कर जैविक खेती अपनाने लगे हैं।

## व्या कहते हैं कृषि वैज्ञानिक

कृषि विज्ञान केंद्र के कृषि वैज्ञानिक डॉ. बीपी सिंह ने बताया कि पर्यावरण शिक्षण केंद्र बौड़ी द्वारा डॉल्लिफन संरक्षण व जैविक खेती को बढ़ावा दिया जा रहा है। केंद्र भी समय-समय पर क्षेत्र में प्रशिक्षण शिविर लगा रहा है। हम लोग जैविक खेती को लगातार बढ़ावा देने के लिए प्रयासरत हैं। जैविक खेती अपनाने के इच्छुक हर किसान की मदद की जा रही है। समय-समय पर बीज व यंत्र भी किसानों को मुहैया कराए जा रहे हैं।

बौड़ी में जैविक खेती में केलने की फसल दिखाते पहिया के किसान विवेक तिवारी

## ‘गंगा और सहायक नदियों में बढ़ते प्रदूषण से डॉल्लिफन का अस्तित्व खतरे में’

पायनियर समाचार सेवा। वाराणसी

राष्ट्रीय स्वच्छ गंगा मिशन, भारत सरकार एवं पर्यावरण शिक्षण केंद्र के संयोजन से विकास एवं शिक्षण समिति, वेस इंडिया, वाराणसी द्वारा आज ‘डॉल्लिफन डे’ 5 अक्टूबर के अवसर पर एक डॉल्लिफन मेला का आयोजन सरस्वती कन्या इण्टर कॉलेज, नीलकंठ के प्रांगण में किया गया। इसमें विभिन्न विद्यालयों के दर्जनों छात्र-छात्राओं ने प्रतिभाग किया और विभिन्न मॉडलों और पोस्टरों के जरिये गंगा में प्रदूषण के रोकथाम और डॉल्लिफन संरक्षण पर अपनी चिंत और प्रतिबद्धता दिखाई। आज के इस कार्यक्रम का प्रमुख उद्देश्य छात्र-छात्राओं एवं आमजन के भीतर डॉल्लिफन संरक्षण का प्रकृति, पर्यावरण एवं मानव से जुड़ने के महत्व को रेखांकित करना था। इसमें प्रमुख रूप से यह बताया गया की गांगेय डॉल्लिफन कैसे हमारी गंगा और गंगा के पर्यावरण की रक्षा के साथ साथ सम्पूर्ण मानव समाज के लिए जरूरी है और कैसे इसका संरक्षण सुनिश्चित किया जाए। कार्यक्रम में मुख्य वक्ता के तौर पर डॉल्लिफन संरक्षण और शिक्षण कार्यक्रम के परियोजना निदेशक डॉ. राजेश कुमार श्रीवास्तव थे। उन्होंने इसके संरक्षण पर प्रकाश डालते हुए बताया कि गंगा और सहायक नदियों में बढ़ रहे प्रदूषण से आज डॉल्लिफन का अस्तित्व खतरे में है। चूंकि डॉल्लिफन स्वच्छ जल में रहने वाला जलचर है अतः इन प्रदूषणों की वजह से इसके प्राकृतिक वास को ही खतरा हो गया है। यही वजह है कि आज डॉल्लिफन की संख्या दिनों दिन घट रही है। डॉ. श्रीवास्तव ने राष्ट्रीय स्तर के निबंध प्रतियोगिता और चित्रकला प्रतियोगिता की भी घोषणा की, जो राष्ट्रीय स्वच्छ गंगा मिशन, भारत सरकार के सहयोग से हो रही है तथा टॉपिक गंगा बचाओ सॉस बचाओ विषय पर आधारित है। इसकी आखिरी तारीख 15 अक्टूबर है। विशिष्ट अतिथि सीए जमुना शुक्ल ने उपस्थितजनों से गंगा को प्रदूषित होने से बचाने की अपील की। प्रधानाचार्या श्रीमती गिरिजा सिंह ने भी बच्चों से गंगा की रक्षा करने की अपील की। इस मेले में प्रमुख रूप से सरस्वती कन्या इण्टर कॉलेज, गुल्शनक खालसा बालिका विद्यालय, चिल्ड्रेन्स अकेडमी कमच, एमपी मेमोरियल स्कूल एंड हॉस्टल, कंदवा, राधा किशोरी राजकीय बालिका इण्टर कॉलेज रामनगर, सेंट्रल हिन्दू स्कूल इत्यादि विद्यालयों ने भाग लिया। इस अवसर पर वेस्ट मॉडल और वेस्ट पोस्टर श्रेणी के अन्तर्गत विजेता प्रतिभागियों को प्रमाणपत्र देकर पुरस्कृत भी किया गया। इस अवसर पर स्नेहा दीक्षित, सिखा झा, अर्चना शुक्ला, मनीषा, प्रतिभा शर्मा, अंजना जायसवाल, किरण श्रीवास्तव, रूपा इत्यादि अध्यापिकाओं की सक्रिय सहभागिता रही। कार्यक्रम का संचालन श्रीमती पूनम शुक्ला और धन्यवाद जपान श्रीमती माला मिश्रा ने किया।

# कृषि वैज्ञानिकों ने बताए जैविक खेती के गुर

संसू. बौड़ी(बहराइच) : कृषि वैज्ञानिकों ने बौड़ी पहुंचकर निकरा परियोजना की हकीकत जानी। इस दौरान किसानों द्वारा की जा रही आलू की खेती का निरीक्षण भी किया। इसके बाद पर्यावरण शिक्षण केंद्र पर कृषक गोष्ठी की। डॉ. वीपी सिंह ने निकरा परियोजना से किसानों के हुए विकास की तहकीकत की। किसानों के हित में किस तरह से कार्य हो रहे है इसकी भी किसानों से जानकारी हासिल की। डॉ. शेर सिंह ने किसानों को बाढ़ प्रभावित क्षेत्र में जैविक खेती करने के गुर बताए। कृषि वैज्ञानिकों ने परियोजना द्वारा क्षेत्र के किसानों को मुहैया कराए गए कृषि यंत्रों के रखरखाव को भी देखा। वैज्ञानिकों ने किसानों को जैविक

# जो महत्व बाघ का जंगल में, वहीं डॉल्फिन का नदियों में

**प्रतिनिधि • बगहा**

पर्यावरण शिक्षण केंद्र परियोजना पदाधिकारी मो. साकीब ने रविवार को कहा कि जो महत्व जंगल में बाघ का है वही महत्व नदियों में डॉल्फिन का है।

देशों ही इकोसिस्टम के संतुलन के लिए जरूरी है। स्वच्छ जल में पायी जाने वाली डॉल्फिन को चार प्रजातियों में से एक सांस है जो भारत की नदियों एवं सहायक नदियों में पायी जाती है। पिछले कुछ वर्षों से इन प्रजातियों में भारी कमी आयी है। जिससे पर्यावरण एवं मानव का अस्तित्व खतरा में आ गया है। परियोजना पदाधिकारी रविवार को छात्रों के शिष्टमंडल को

विद्यालय के छात्रों को झंडी दिखाकर रवाना करते परियोजना पदाधिकारी व अन्य.

वालीकिनार रवाना होने से पूर्व उन्हें संबोधित कर रहे थे. गांगेय डॉल्फिन संरक्षण शिक्षा कार्यक्रम के तहत बगहा

के पांच विद्यालय के छात्र गंगा बेसिन में बसने वाले समुदाय के लोगों में जागरूकता अभियान चलायेंगे.

रविवार को नगर के द चंपारण चैप्टर पब्लिक स्कूल, ऑक्सफोर्ड पब्लिक स्कूल चखनी का संत तैसा स्कूल तथा मध्य विद्यालय रतनमाला के छात्र गंडक किनारे स्थित पांच पंचायतों का किया गया है। छात्रों को डॉल्फिन के प्रति जागरूक करने के लिए वालीकिनार रवाना हुए. वहां वे नदी के किनारे रहने वाले तथा नदी पर आश्रित लोगों को नदी स्वच्छता, घन्य जीव संरक्षण तथा इनके पर्यटन के लिए जागरूक करेगा तथा इससे होने वाले लाभ के बारे में बतायेंगे. पर्यावरण शिक्षण केंद्र परियोजना पदाधिकारी ने बताया कि यूपी एवं बिहार के नदी के किनारे स्थित लगभग 750 स्कूलों को डॉल्फिन प्रजाति के प्रशिक्षण के संबंध में जागरूक करने के लिए शामिल किया गया है. शिक्षकों को कक्षा स्तर एवं विद्यालय स्तर पर डॉल्फिन जागरूकता कार्यक्रम आयोजित करने के लिए प्रशिक्षित किया गया है. द चंपारण चैप्टर पब्लिक स्कूल के निदेशक दीपक राही ने बताया कि प्रत्येक विद्यालय के विद्यार्थियों के एक समूह को डॉल्फिन क्लब के रूप में गठन किया गया है. जो चयनित पंचायत में काम करेगा. उन्होंने बताया कि यूपी के बलरघाट जनपद के गंगा नदी के सहायक नदी घाघरा तथा बिहार में बेतिया जिला के गंडक नदी के किनारे पांच ग्राम पंचायतों का चयन डॉल्फिन के पाये जाने की संभावना को देखते हुए किया गया है. ऑक्सफोर्ड पब्लिक स्कूल के निदेशक अश्व राव संगीता राव, समन्वयक तारकेश्वर राव, दीपक शायमन अर्चना, अभिजीत कुमार आदि उपस्थित रहे.

■ गंडक के किनारे स्थित पांच पंचायतों का किया गया है चयन

■ मधुआरी एवं गंगा किनारे बसे लोगों को दी जायेगी जानकारी

■ गंडक किनारे के सात जिलों में चल रहा अभियान

## 55 विद्यालयों में गांगेय डॉल्फिन संरक्षण शिक्षा कार्यक्रम

गोण्ड (वि.सं.)

जल संसाधन, नदी विकास एवं गंगा संरक्षण मन्त्रालय, भारत सरकार एवं राष्ट्रीय स्वच्छ गंगा मिशन (एन.एम.सी.जी.) के सहयोग से पर्यावरण शिक्षण केंद्र (सी.ई.ई.) द्वारा राष्ट्रीय जलीय जीव गांगेय डॉल्फिन व उसके पर्यावास नदी तत्र के संरक्षण हेतु जन चेतना लाने व नदी आश्रित समुदायों को संरक्षण के प्रति संवेदनशील बनाने के लिए गांगेय डॉल्फिन संरक्षण शिक्षा कार्यक्रम का क्रियान्वयन जनपद गोण्डा के करनैलगंज के अर्न्तगत घाघरा नदी के किनारे अवस्थित 55 विद्यालयों में किया जा रहा है।

संस्कृतप्रस्त प्रजाति गांगेय डॉल्फिन एवं अन्य जलीय जीवों के संरक्षण के प्रयासों को और अधिक प्रभावी बनाने व संरक्षण के प्रति जन जागरूकता बढ़ाने विषयक डॉल्फिन शिक्षकों की समीक्षा

बैठक सह अभिमुखीकरण कार्यशाला का आयोजन पर्यावरण शिक्षण केंद्र (सी.ई.ई.) द्वारा खण्ड संसाधन केंद्र, करनैलगंज, गोण्डा में आयोजित किया गया, कार्यशाला में 55 शिक्षकों ने प्रतिभाग किया। कार्यशाला को सम्बोधित करते हुए सह समन्वयक मो0 इंदरीस व रवि प्रताप सिंह, आर्द्रश अग्र्याक ने कहा कि नदियों में प्रदूषण के स्तर में लगातार वृद्धि हो रही है जिससे गांगेय डॉल्फिन, घड़ियाल व कछुओं जैसे जलीय जीवों की प्रजातियां संकट में पड़ती जा रही हैं। शिक्षकों व समाज के प्रबुद्ध वर्ग को इनके संरक्षण के लिए आगे आना चाहिए। गांगेय डॉल्फिन एक ऐसा जलीय जीव है जो नदी तत्र की स्वच्छता व स्वास्थ्य का परिचायक एवं सूचक है। इस अद्भुत जलीय जीव के संरक्षण को नीतियों व पहल में नदी किनारे बसे समुदायों का जागरूक व संवेदनशील होना बेहद आवश्यक है। मो0 साकिब खां,

परियोजना अधिकारी, पर्यावरण शिक्षण केंद्र (सी.ई.ई.) ने कहा कि गांगेय डॉल्फिन के अस्तित्व पर संकट का मुख्य कारण मनुष्य द्वारा पर्यावरणीय हितों एवं जैवविविधता के संरक्षण के प्रयासों की लगातार अनदेखी है। मनुष्य द्वारा प्राकृतिक संसाधनों के अन्धाधुंध दोहन से जलवायु परिवर्तन की समस्या विकट होती जा रही है, परिणामस्वरूप पृथ्वी पर कई जीव विलुप्ति के कगार पर हैं। यदि जीवों पर संकट इसी प्रकार रखा हो तो वह दिन दूर नहीं जब मानव जाति भी अपना अस्तित्व खो बैठेगी। प्राचीन समय से ही नदियां जीवनदायनी रही हैं व गांगेय डॉल्फिन की नदियों में उपस्थिति नदियों की निर्मलता का सूचक है। इस अवसर पर स्वयंसेवक अरविंद कुमार व शिक्षक के0 के0 मौर्या, सह समन्वयक, सालिक राम वर्मा, नागेन्द्र मणि त्रिपाठी, मो0 उर्वैस, मो0 असलम, अरूण सिंह, अनुगण तिवारी आदि उपस्थित रहे।

# जंगल में बाघ की तरह नदियों में डॉल्फिन भी जरूरी

**बगहा.** नदियों में बढ़ते प्रदूषण, पर्यावरण के क्षरण एवं अवैध शिकार के कारण देश में डॉल्फिन की संख्या घटती जा रही है. सरकार ने डॉल्फिन को राष्ट्रीय जलीय जीव घोषित किया है. डॉल्फिन के संरक्षण के लिए गंगा एवं उसके आस पास के सहायक नदियों के आस पास के क्षेत्रों में लोगों के बीच जागरूकता अभियान चलाने डॉल्फिन की उपयोगिता के बारे में बताया जा रहा है. सेंटर फॉर एनवायरनमेंट एजुकेशन के बेनर तले मंगलवार को दो दिवसीय राष्ट्रीय डॉल्फिन मेला का शुभारंभ किया गया. बिसका उपबोर्डन वालीकिनार संसाधन सतीशचंद्र दूरे ने किया. इस मौके पर एसएसबी के कमांडेंट अनिल कुमार शर्मा तथा सहायक कमांडेंट राजु यादव भी उपस्थित रहे. कार्यक्रम को संबोधित करते हुए डॉल्फिन बाघ के रूप में प्रसिद्ध तथा जुलीनिकल सर्वे ऑफ इंडिया के निदेशक गोपाल शर्मा ने कहा कि जिस तरह जंगल के जीवन के लिए बाघ महत्वपूर्ण है, उसी तरह भारत के राष्ट्रीय जलीय जीव डॉल्फिन की उपस्थिति नदियों की सेहत का संकेतक है. नदियों के गहरे और साफ पानी में पाए जाने वाली डॉल्फिन गंगा के अलगाव असम की ब्रह्मपुत्र नदी में भी पाई जाती है. 1990 से पहले गंगा, चंबल, यमुना या ब्रह्मपुत्र में पाए जाने वाली डॉल्फिनो पर कोई खतरा नहीं था. नब्बे के दशक में ही चीन, कोरिया और जापान में यौनवधक दवाओं में डॉल्फिन की चर्बी आदि का इस्तेमाल बढ़ने लगा था. डॉल्फिनो को मार कर उनकी चर्बी निकाली जाने लगी और उनकी खाल को उबाल कर उसका तेल निकाला जाने लगा था. इस तेल के बारे में नीम-हकीमों ने दावा करना शुरू किया कि इसकी मालिसा से शरीर की लवां मुलायम और कांतिमान बनती है. एक डॉल्फिन से औसतन चार-पांच किलो तक चर्बी मिल जाती है. भारत में इसकी औसत कीमत दार्द से तीन हजार रुपये प्रति किलोग्राम होती है. चीन में इसकी कीमत 30-40 हजार प्रति किलोग्राम से भी ज्यादा हो जाती है. शिकारी इसी मुनाफे के लालच में गंगा, चंबल और ब्रह्मपुत्र की डॉल्फिनो का अवैध दंग से शिकार करते रहे हैं. चुंकि अपने देश में जलीय जलजीवी की सुरक्षा का प्रायः कोई इतनाम नहीं है और यह काम स्थानीय लोगों की निगरानी पर ही छोड़ा गया है, निहायजा अवैध शिकार के कारण डॉल्फिनो की संख्या पहले तो काफी तेजी से गिरी और फिर रासायनिक कचरे के कारण उनका समूचा जीवन ही दाय पर लग गया. इस मौके पर विद्यालय के छात्रों के द्वारा कई तरह के कार्यक्रम का आयोजन किया गया. मुजफ्फरपुर जिले के चांदेवारी उत्कर्मित मध्य विद्यालय के छात्र अमृत पटेल एवं सोहास उत्कर्मित मध्य विद्यालय के छात्र श्याम बालक कुमार ने स्टोन पेंटिंग प्रतियोगिता में टॉप किया है. इस मौके पर डब्ल्यूडब्ल्यूके के कमलेश चौबे, रेजर आरके सिन्हा, परियोजना अधिकारी मो. साकिब खां, शिक्षक अजय कुमार, पर्यावरण कार्यकर्ता फुलवेंद पटेल मौजूद थे. कार्यक्रम का संचालन दीपक राही ने किया.
